FORM 10-K

(Mark One)

- ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the fiscal year ended December 31, 2014

OR

- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the transition period from to

Commission file number 333-184487

IMMUDYNE, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

76-0238453

(I.R.S. Employer
Identification No.)

**50 Spring Meadow Rd.
Mount Kisco, NY 10549**

(Address of principal executive offices)

Registrant's telephone number, including area code:
(914) 244-1777

Securities registered pursuant to Section 12(b) of the Act:
None.

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended ("Exchange Act") during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting
company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of voting common stock held by non-affiliates computed by reference to the price at which the common stock was last sold on June 30, 2014, was \$2,885,273. All (i) executive officers and directors of the registrant and (ii) all persons who hold 10%

or more of the registrant's outstanding common stock, have been deemed, solely for the purpose of the foregoing calculation, to be "affiliates" of the registrant. Accordingly, effective as of June 30, 2014, the registrant's aggregate market value was less than \$50 million and the registrant qualifies for "smaller reporting company" status under Rule 12b-2 of the Exchange Act and is subject to the disclosure requirements and filing deadlines for smaller reporting companies.

As of March 30, 2015 there were 30,729,973 shares of common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE:

None.

NOTE ABOUT FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended, (the “Exchange Act”) regarding our company that include, but are not limited to, projections of earnings, revenue or other financial items; statements of the plans, strategies and objectives of management for future operations; statements concerning proposed new products, services or developments; statements regarding future economic conditions or performance; statements of belief; and statements of assumptions underlying any of the foregoing. These forward-looking statements are based on our current expectations, estimates and projections about our industry, management’s beliefs and certain assumptions made by us. Words such as “anticipates,” “expects,” “intends,” “plans,” “predicts,” “potential,” “believes,” “seeks,” “hopes,” “estimates,” “should,” “may,” “will,” “with a view to” and variations of these words or similar expressions are intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions that are difficult to predict. Although we believe that our expectations expressed in these forward-looking statements are reasonable, our expectations may later be found to be incorrect. Our actual results could be materially different from our expectations. Important risks and factors that could cause our actual results to be materially different from our expectations are set forth in “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” “Our Business” and other sections in this report. Other sections of this report include additional factors that could adversely impact our business and financial performance.

Unless otherwise indicated, information in this report concerning economic conditions and our industry is based on information from independent industry analysts and publications, as well as our estimates. Except where otherwise noted, our estimates are derived from publicly available information released by third party sources, as well as data from our internal research, and are based on such data and our knowledge of our industry, which we believe to be reasonable. Unless otherwise indicated, none of the independent industry publication market data cited in this report was prepared on our or our affiliates’ behalf.

The forward-looking statements made in this report are based only on events or information as of the date on which the statements are made in this report. Except as required by law, we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events. You should read this report and the documents we refer to in this report and have filed as exhibits to this report completely and with the understanding that our actual future results may be materially different from what we expect.

Additional information on the various risks and uncertainties potentially affecting our operating results are discussed in this report and other documents we file with the Securities and Exchange Commission (the “SEC”). We undertake no obligation to revise or update publicly any forward-looking statements for any reason, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on these forward-looking statements.

As used in this report, “Immudyne,” “Company,” “we,” “our” and similar terms refer to Immudyne Inc., unless the context indicates otherwise.

PART I

Item 1. Business

Our Company

We manufacture, distribute and sell natural immune support products; namely proprietary yeast beta glucans which are natural extracts that have been shown through testing and analysis and scientific research to support the immune system. We believe, based on testing and analysis conducted by third parties on our behalf, that the beta glucans derived from yeast we manufacture are superior to any other beta glucans on the market.

Our beta glucan products and manufacturing processes are protected by patents and trade secrets, and we believe we are compliant with current good manufacturing practices (“GMPs”). Further, yeast beta glucans are classified as generally recognized as safe (“GRAS”) by the Food and Drug Administration (“FDA”). Historically, we have sold our proprietary additives, for both oral and topical use, primarily via business-to-business to large dietary supplement and cosmetic companies. We have also sold our own standalone product lines primarily on a word-of-mouth basis and through our website.

Our plans are to commercialize sales of our products on a more meaningful, global basis. We hired three senior marketing executives late in the fourth quarter of 2014 (and early in 2015). We have performance based contracts with these executives, which allow us to continue to maintain a relatively low overhead. Our priority is to actively pursue opportunities to market our products and increase sales.

We originally incorporated under the laws of British Columbia, Canada, in 1987 under the name Anina Resources, Inc. and subsequently changed our name to Immudyne, Inc. and our jurisdiction to the State of Wyoming by continuance in September 1987. On June 30, 1994, we changed our jurisdiction to Delaware by merger with and into Immudyne, Inc., a Delaware corporation formed on June 21, 1994.

None of the testing and analysis or scientific research mentioned in this report has been subject to the oversight of the FDA or any comparable regulatory body, and no regulatory body has attested to the efficacy of beta glucans in supporting the immune system or otherwise treating disease. Further, the marketing of beta glucans is not subject to FDA approval, and we are prohibited by Federal Trade Commission (“FTC”) and FDA regulations from suggesting in advertisements and product labels that our products mitigate, treat, cure or prevent a specific disease or class of disease.

Our Products

We have a developed proprietary approach to produce what we believe to be superior beta glucans derived from yeast. Our yeast beta glucans are odorless and tasteless, making them suitable for use in a wide variety of oral and topical applications, including in our nutraceutical and cosmetic product lines. As the U.S. and international markets become more aware of the value of our proprietary products, we believe demand for our beta glucans will increase.

Our sales and marketing efforts are now concentrated on our oral (nutraceutical) and topical-use (cosmetic) products for the strategic additive market, as well as our own lines to healthcare professionals, distributors and direct-to-consumer sales.

Beta Glucans

Beta glucans, or β -Glucans, are a natural extract that are considered to be “biological response modifiers” that support the immune system. The most common sources of beta glucans are from the cell walls of baker’s yeast, the cellulose in plants, the bran of cereal grains and certain fungi and bacteria. The differences between beta glucan chemical structures are significant in regards to solubility and overall biological activity. In fact, beta glucans derived from mushrooms and cereals do not appear to have the same effects on human health as beta glucans derived from yeast.

We derive our high-grade beta glucan from yeast cell walls using proprietary processes in our manufacturing facility. Our beta glucan is generally free of yeast by-product and endotoxins, and has demonstrated reliability in terms of both stability and biological response. In fact, we commissioned an analytical side-by-side comparison by a laboratory which conducts testing and analysis of nutraceutical compounds, between our beta glucan and each of the beta glucans manufactured by our two main competitors. The results of the analytical comparison demonstrated the superiority of our beta glucan which was far less impure and more uniform in composition than those of our competitors.

The health benefits of yeast beta glucans have been demonstrated through extensive testing and analysis and scientific research on yeast beta glucans generally, and we are committed to supporting evidence-based studies that demonstrate the health benefits of our products. Scientific research on beta glucan derived from yeast cell walls has been conducted over the years by renowned medical laboratories, including Roger Williams University, Boston University, The Stone Center, Baylor College of Medicine, U.S. Armed Forces Radiobiology Institute, Stanford University, Southwest Research Institute, Case Western Reserve University, University of Arkansas, North Carolina State University, University of Bern, Switzerland, and the China Agricultural University, China. As more studies are conducted on beta glucans, the potential benefits to human health continue to emerge.

In fact, in two studies reviewed in an article published in the Japanese Journal Society Terminal Systemic Diseases in 2000, participants ingesting our yeast beta glucan showed a decreased reoccurrence of cancer in cancer remission patients and increased survival rates in terminally-ill cancer patients. In addition, female study participants testing the effect of our yeast beta glucan in topical applications saw a significant reduction in the number and intensity of skin wrinkles over the eight-week study. We presented the results of these and other studies supporting the efficacy of our products at the BIO-Europe global biotechnology conference in November 2010 and World Immune Regulator Meeting in Davos, Switzerland, in March 2012.

Healthcare professionals, including licensed physicians, alternative medicine practitioners, scientists and researchers have taken an interest in our immune-support products as a means of offering alternative or complementary approaches for maintaining a healthy and active lifestyle. These expressions of interest have often resulted in proposals for research studies and recommendations of our products. We plan to build upon this interest and hope to grow our contacts with licensed physicians who utilize our product in a clinical setting and with researchers who have the resources to conduct testing and analysis on our products.

We also have relationships with medical doctors who in the past have conducted self-funded studies in which we supplied our product free of charge. However, we do not have any formal clinical development or research agreements with these institutions and doctors. Dr. Sven Rohmann, PhD is our Global Chief Medical Officer. Dr. Rohmann is a worldwide authority on innate immunity. Dr. Rohmann has an extensive medical and business background, including having spent 10 years with Merck Serono, where he served as the Global Head, Strategic Marketing, Oncology. Dr. Joseph DiTrolio of the Roseland, New Jersey Surgery Center and St. George's University School of Medicine and also a director of the Company, Dr. Allan Whitberg, previously of Roger Williams Medical Center in Providence, Rhode Island and currently affiliated with Boston University School of Medicine, and Dr. Stephen Petteruti of The Petteruti Center For Life Extension in Warwick, RI, are among the medical doctors with whom we have relationships and who have conducted self-funded studies on our product. We also have established a relationship with National Jewish Health in Denver, Colorado and we have additional opportunities to have further studies conducted at leading institutions. We have also established a partnership with the leading physicians of the Stone Center of New Jersey to educate patients about the benefits of supplementing their chemotherapy and radiation treatments with our yeast-beta glucan products.

To be sure, none of the testing and analysis or scientific research mentioned in this annual report has been subject to oversight of the FDA or any comparable regulatory body, and no regulatory body has attested to the efficacy of beta glucans in supporting the immune system or otherwise treating disease. Further, the marketing of beta glucans is not subject to FDA approval, and we are prohibited by FTC and FDA regulations from suggesting in advertisements and product labels that our products mitigate, treat, cure or prevent a specific disease or class of disease.

Yeast Beta Glucan Product Lines

Our nutraceutical and cosmetic product lines consist of our natural, premium yeast beta glucans in oral and topical applications. Nutraceuticals are plant-derived products, such as our yeast beta glucans, with pharmaceutical-like properties that have biologically-therapeutic effects in humans in addition to the basic nutritional value found in foods. We offer our yeast beta glucans as natural raw material ingredients in bulk quantities and finished, consumer products packaged under our brands and private label brands. The FDA has classified yeast beta glucans as GRAS.

Our principal, branded lines of daily oral supplements are dietary supplements containing proprietary combinations of our yeast beta glucan to support immune system function. Our topical rejuvenating serums and creams consist of our patented yeast-derived beta glucan and other natural ingredients intended to support the skin's immune system response and defense, skin renewal and repair of sun and environmental damage.

Sales and Marketing

We hired three senior marketing executives late in the fourth quarter of 2014 (and early in 2015). We have performance based contracts with these executives, allowing us to continue to maintain a relatively low overhead. Our priority is to actively pursue opportunities to market our products and increase sales.

Our sales and marketing strategy primarily consists of building the brand recognition of our product lines and our proprietary yeast beta glucans. We plan to sell our products primarily on a word-of-mouth basis through distributors and our website as standalone product lines, as well as business-to-business as a cosmetic enhancement or dietary supplement.

Our principal products are consumables that can generate a stream of repeat sales with the same end customers over an extended period, providing significant lifetime value for each customer gained. To reach these customers, our marketing strategy includes online sales promotions through our website, an affiliate sales program, trade advertising, consumer research and search engine and digital advertising. In addition, we intend to build our brand recognition with healthcare professionals through further testing and analysis of our products and by providing practitioners and clinics with education and support. We believe that the recommendation of our products by healthcare professionals to their patients provides the best possible endorsement.

We also have marketed our products by presenting at international biotechnology and alternative medicine conferences and through nutraceutical industry associations and tradeshow. Notably, we presented the outcome of our cancer studies at the World Immune Regulator Meeting in Davos, Switzerland in 2012. The special focus of the meeting was on innate and adaptive immune response and the role of tissues in immune regulation. Previously, we presented the results of the studies demonstrating the efficacy of our yeast beta glucan in terminally ill cancer patients and cancer remission patients at the BIO-Europe biotechnology partnership conference in Munich, Germany.

Manufacturing and Sourcing

We have focused on the production of immune system support compounds including our beta glucans derived from yeast for over 20 years. Our staff produces consistently high-grade, particulate and reliable beta glucan, included in our nutraceutical and cosmetic product lines, in our Kentucky-based production plant. For certain of our packaged consumer goods, we use third party contractors for encapsulation, bottling and labeling. These contractors are subject to regular government inspections, and to the best of our knowledge, comply with current GMPs and hold the necessary drug manufacturing licenses and processed food registrations required by their respective state regulators. Such packaging services are readily available from multiple sources.

The raw materials necessary to manufacture beta glucans in our Kentucky plant, principally consisting of baker's yeast, are common and readily available. Our principal suppliers are the Lesaffre Group and Brenntag Group. We hold our suppliers to strict quality and delivery specifications as part of our GMP compliance and quality control procedures, including quality assurance of raw materials used in the production of our products.

Our beta glucan products and manufacturing processes are protected by registered and pending patents and trade secrets. We believe our manufacturing facilities and practices are compliant with published current GMPs established by the FDA for dietary supplements.

Customers

We sell our products direct to consumers and to pharmaceutical, nutraceutical and consumer product companies in the U.S. market. We plan to expand our sales to the international market. We focus on establishing and growing long-term relationships with our customers, and we believe that the majority of our customers view us as a strategic long-term supplier and value the quality of our beta glucan products. Our sales through distributors typically are made pursuant to supplier agreements executed in the ordinary course of business with individual orders made on purchase orders.

As we have sought to expand our U.S. and global sales, we have marketed our nutraceutical and cosmetic product lines as a raw material ingredient available in bulk quantities and finished, consumer products packaged under our brands and private label brands. We anticipate that our customer mix will change accordingly to include more sales through distributors, and our planned affiliate program, and direct sales to consumers. We also encourage nutraceutical and nutricosmetic manufacturers and formulators purchasing our beta glucans as all-natural raw material ingredients to identify and promote our brand in their products. As our principal products are consumables that typically generate repeat sales streams with the same end customers over an extended period, we historically have not experienced seasonality of sales.

Our largest customer, Michel Mercier Products, Inc. (d/b/a M.M.P, Inc.), accounted for 79% our sales in 2014 and 77% of our sales in 2013. Our second largest customer accounted for 12% our sales in 2014 and 9% of our sales in 2013.

Competition

The markets for nutritional supplements and skin care products are highly competitive, consisting of a large number of manufacturers, distributors and retailers, none of which dominates the fragmented and diverse market. We compete for sales direct to consumers, through distributors and business-to-business.

Although we believe, based on testing and analysis by third parties on our behalf, that our yeast beta glucan is superior, we compete with other companies manufacturing beta glucans from yeast and other sources as well as companies producing other food ingredients and nutritional supplements for human use. Many end consumers may consider such products to be a replacement for the products we manufacture and distribute. Many of our competitors have greater marketing, research and capital resources than us, and may be able to offer their products at lower costs because of their greater purchasing power or lower cost of raw materials and manufacturing.

We anticipate expanding our sales on a meaningful basis as part of our new marketing strategy focusing on our nutraceutical and cosmetic product lines. We anticipate competing in these markets on the basis of quality, our proprietary manufacturing processes, research data and effective marketing campaigns promoting the benefits of our natural immune support products. There are no assurances that our products will be able to compete in these markets, however, or that our marketing strategy will be successful.

Intellectual Property

We rely on the patent and trademark protection laws in the U.S., and trade secrets which are not protected by patents, to protect our intellectual property and maintain our competitive position in the marketplace. We have nine registered U.S. patents, consisting of both use and process patents, with expiration dates ranging from 2015 to 2026. Additionally, we currently have filed four new provisional patents, and we intend to apply for additional patents in the future as new products, uses and manufacturing processes are developed. We maintain trademarks registered in the U.S. for our business name and related to our product brands. In addition, we have registered and maintain internet domain names related to our business, including "immudyne.com." Collectively, the patents, trademarks and domain names that we hold are of material importance to us. However, at this time we may not be able to adequately defend our intellectual property rights due to our lack of financial resources, though, to date, we have no knowledge of any infringement of our intellectual property.

Research and Development

Our expertise for many years has been in the enhancement of efficient, stable and cost-effective production systems for beta glucan products derived from yeast. While we have not incurred any research and development expenses in our last two fiscal years, we may increase future investments to establish the scientific basis for health claims of our existing products and to develop new products and applications based on our growth and available capital.

Governmental and Environmental Regulation

Our business and the manufacturing, distribution and sale of our beta glucan products are regulated in the U.S. primarily by the FDA and the FTC.

The FDA enforces the FDCA and Dietary Supplement Health and Education Act (“DSHEA”) as they pertain to foods, food ingredients, cosmetics and dietary supplement production and marketing. Dietary supplements and nutraceuticals are regulated as a category of food, not as drugs. The FDA classifies “Yeast extract (Bakers)” as GRAS, which substances by definition are not food additives. Most GRAS substances have no quantitative restrictions as to use, although their use must conform to current GMPs. The FDA promulgates GMP guidelines to ensure that dietary supplements are produced in a quality manner, do not contain contaminants or impurities and are accurately labeled. GMPs include requirements for establishing quality control procedures, designing and constructing manufacturing plants, testing ingredients and finished products and record keeping and handling of consumer product complaints. The FDA has broad authority to enforce the provisions of federal law applicable to dietary supplements and cosmetics, including the power to monitor claims made in product labeling, to seize adulterated or misbranded products or unapproved new drugs, to request product recall, to enjoin further manufacture or sale of a product, to issue warning letters and to institute criminal proceedings.

Advertising and product claims regarding the efficacy of products are also regulated by the FTC. The FTC regulates the advertising of dietary supplements and other health-related products to ensure that any advertising is truthful and not misleading, and that an advertiser maintains adequate substantiation for all product claims. FTC enforcement actions may result in consent decrees, cease and desist orders, judicial injunctions and the payment of fines with respect to advertising claims that are found to be unsubstantiated.

Yeast beta glucans are classified as GRAS by the FDA and our oral and topical-use product lines containing our yeast beta glucan are marketed as dietary supplements and cosmetics, respectively. Under current U.S. regulations, our products must comply with certain labeling requirements enforced by the FDA and FTC, but otherwise generally are not required to receive regulatory approval prior to introduction into the U.S. market. We believe we are in compliance with all material government regulations applicable to our products.

In the EU markets, the European Food Safety Authority (“EFSA”), an advisory panel to the European Commission, performs all scientific assessments of health claims on food and supplement labels. The European Commission will consider the opinions of EFSA in determining whether to include a health claim on a list of permissible claims. Once published, only health claims for ingredients and products included on the list may be used in promotional materials for products marketed and sold in the European Union. The marketability of our products may be limited as we look to expand our sales in the EU if the health claims of our products are not included on the list.

In addition to the foregoing, our operations are subject to federal, foreign, state and local government laws and regulations, including those relating to zoning, workplace safety and accommodations for the disabled, and our relationship with our employees is subject to regulations, including minimum wage requirements, anti-discrimination laws, overtime, working conditions and citizenship requirements. We currently do not incur any material costs in connection with our compliance with applicable environmental laws as our manufacturing processes generate minimal discharge. Furthermore, the cost of maintaining compliance with applicable environmental laws has not, and we believe, in the future, will not, have a material adverse effect on our business, results of operations and financial condition. We believe we are in substantial compliance with all material governmental regulations applicable to our operations.

Employees

As of December 31, 2014, we had 3 full-time employees, 13 part-time employees and additional consultants worldwide. We outsource many of our product marketing activities to consultants who provide services to us on a project basis. We believe that relations with our employees are satisfactory. We have no collective bargaining agreements with our employees. All full-time employees and our officers and directors are eligible to participate in our group health and dental insurance plans.

Website Access Disclosure

Our internet website address is <http://www.immudyne.com>. We make available free of charge through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those, as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (the "SEC").

Item 1A. Risk Factors

Our business and an investment in our securities are subject to a variety of risks. The following risk factors describe the most significant events, facts or circumstances that could have a material adverse effect upon our business, financial condition, results of operations, ability to implement our business plan, and the market price for our securities. Many of these events are outside of our control. If any of these risks actually occurs, our business, financial condition or results of operation may be materially adversely affected. In such case, the trading price of our common stock could decline and investors in our common stock could lose all or part of their investment.

Risks Related to Our Business

The report of our independent registered public accounting firm contains explanatory language that substantial doubt exists about our ability to continue as a going concern.

The independent auditor's report on our financial statements contains explanatory language that substantial doubt exists about our ability to continue as a going concern as at December 31, 2014, we had a negative net working capital position. If we are unable to fund operations through our operating business, and are unable obtain sufficient financing in the near term as required or achieve profitability, then we would, in all likelihood, experience severe liquidity problems and may have to curtail our operations. If we curtail our operations, we may be placed into bankruptcy or undergo liquidation, the result of which will adversely affect the value of our common shares.

We have generated losses and not yet achieved positive cash flows, which may adversely affect our liquidity and ability to continue as a going concern.

We cannot assure you that we will be able to achieve revenue growth, profitability or positive cash flow, on either a quarterly or annual basis, or that profitability, if achieved, will be sustained. Our ability to meet our long-term business objectives likely will be dependent upon establishing increased cash flow from operations or securing other sources of financing. We have implemented a new sales and marketing strategy to focus on higher-margin products that carry what we believe to be greater opportunities for growth in the U.S. and international markets. In addition, management has instituted cost-cutting measures; including terminating certain employees that were not contributing to the business and ceasing our operations in the low-margin feed additive product line, which we believe should result in improved efficiencies of our operations going forward. If our losses continue, however, our liquidity may be severely impaired, our stock price may fall and our shareholders may lose all or a significant portion of their investment.

We may not be able to implement our growth and marketing strategy successfully or on a timely basis or at all.

Our future success depends, in large part, on our ability to implement our growth strategy of expanding distribution and sales of our beta glucan oral and topical application products, attracting new consumers to our brand and introducing new product lines and product extensions. Our ability to implement this growth strategy depends, among other things, on our ability to:

- enter into distribution and other strategic arrangements with other potential distributors of our all-natural raw material products;

- increase our brand recognition;
- expand and maintain brand loyalty; and
- research new applications for existing products and develop new product lines and extensions.

Our sales and operating results will be adversely affected if we fail to implement our growth strategy or if we invest resources in a growth strategy that ultimately proves unsuccessful.

If we fail to develop and maintain our brand, our business could suffer.

We believe that developing and maintaining our brand is critical to our success. The importance of our brand recognition may become greater as competitors offer more products similar to ours. Our brand-building activities involve increasing awareness of our brand, creating and maintaining brand loyalty and increasing the availability of our products. If our brand-building activities are unsuccessful, we may never recover the expenses incurred in connection with these efforts, and we may be unable to implement our business strategy and increase our future sales.

We are subject to government regulation of the processing, formulation, packaging, labeling and advertising of our consumer products, and any failure to comply with such regulations could require us to repackage, recall or undergo regulatory approval of our products, which would have a material adverse effect on our business.

Under the FDCA and DSHEA companies that manufacture and distribute foods, food ingredients, cosmetics and dietary supplements in the U.S., such as our yeast beta glucan products, are limited in the claims that they are permitted to make about nutritional support on the product label without the approval of the FDA. Any failure by us to adhere to the labeling requirements could lead to the FDA requiring that our products be repackaged and relabeled, which would have a material adverse effect on our business. In addition, advertising and product claims regarding the efficacy of products are also regulated by the FTC. Companies are responsible for the accuracy and truthfulness of, and must have substantiation for, any such statements. These claims must be truthful and not misleading. Statements must not claim to diagnose, mitigate, treat, cure or prevent a specific disease or class of disease. We are able to market our oral and topical application products in reliance on the GRAS status of our active ingredient, yeast beta glucan. No governmental agency or other third party has made a determination as to whether or not our products have achieved GRAS status. If the FDA, another regulatory authority or other third party denied our GRAS status for our yeast beta glucan products, we could face significant penalties or be required to undergo the regulatory approval process in order to market our products. In such event, our business, financial condition and results of operations would be adversely affected as we cannot assure you that in such a situation our yeast beta glucan products would be approved.

The FDA's current GMPs describe policies and procedures designed to ensure that dietary supplements are produced in a quality manner, do not contain contaminants or impurities, and are accurately labeled and cover the manufacturing, packaging, labeling and storing of supplements, with requirements for quality control, design and construction of manufacturing plants, testing of ingredients and final products, record keeping, and complaints processes. Those who manufacture, package or store dietary supplements must comply with current GMPs. If we or our suppliers fail to comply with current GMP procedures, the FDA may take enforcement action against us or our suppliers.

The processing, formulation, packaging, labeling and advertising of our yeast beta glucan products in the U.S. are subject to regulation by the FDA, FTC and other federal agencies, and our activities are also subject to regulation by various agencies of the states and localities in which our yeast beta glucan products are sold. Any changes in the current regulatory environment could impose requirements that would limit our ability to market our yeast beta glucan products and make bringing new products to market more expensive. In addition, the adoption of new regulations or changes in the interpretation of existing regulations may result in significant compliance costs or discontinuation of product sales and may adversely affect our business, financial condition and results of operations. While our yeast beta glucan products currently are categorized as foods, it is possible that the FDA or a state regulatory agency could classify these products as a cosmetic or a drug. If our products are classified as cosmetics rather than a food, we would be limited to making claims that our products cleanse and beautify, rather than making structure or function claims. If our yeast beta glucan products are classified as drugs, we would not be able to market our products without going through the drug approval process. Either of these events would limit our ability to market our products effectively and cost-efficiently, and would adversely affect our financial condition and results of operations. If the FDA or a state regulatory agency viewed our products as cosmetics or drugs, they could claim that the products are misbranded and require that we repackage and relabel the products and impose civil and criminal penalties on us. Either or both of these situations could adversely affect our business and operations.

In the European Union, or the EU, markets, the European Food Safety Authority, or EFSA, an advisory panel to the European Commission, performs all scientific assessments of health claims on food and supplement labels. The European Commission will consider the opinions of EFSA in determining whether to include a health claim on the list of permissible claims. Once published, only health claims for ingredients and products included on the list may be used in promotional materials for products marketed and sold in the European Union. The marketability of our products may be limited as we look to expand our sales in the EU if the health claims of our products are not included on the list.

We have subjected, and will continue to subject, our products to testing and analysis. If the findings of these studies are challenged or found insufficient to support our health claims, we may need to perform additional testing and analysis before we are able to successfully market such products.

Although our yeast beta glucan products are supplements, as opposed to drugs, we have subjected, and will continue to subject, our products to testing and analysis to ensure that we are able to continue to deliver a superior product so that we may successfully market such products, though no such trials are currently required for marketing approval by the FDA or any comparable regulatory body. Testing and analysis for new product uses can require a significant amount of resources and there is no assurance that the results will be favorable to the claims we make for our products, or that they will be sufficient to support our claims. If the findings of our testing and analysis are challenged or found to be insufficient to support our claims, additional testing and analysis may be required before we are able to successfully market our products. No such testing and analysis has been, nor will it be when conducted, subject to the approval by the FDA or any comparable regulatory body.

If we undertake product recalls or incur liability claims with respect to our yeast beta glucan products, such recalls or claims could increase our costs and adversely affect our reputation, business and results of operations.

Our yeast beta glucan products are designed for human consumption and we face product recalls or liability claims if the use of our products is alleged to have resulted in injury or death. To date, we have not (i) conducted any product recalls, (ii) received any product liability claims from third parties, or (iii) received any reports from an end consumer of any adverse effect resulting from our products. Yeast beta glucan is classified as a food ingredient and is not subject to pre-market regulatory approval in the U.S. However, our yeast beta glucan products contain ingredients that do not have long histories of human consumption. Previously unknown adverse reactions resulting from consumption of these ingredients could occur. We may have to undertake various product recalls or be subject to liability claims, including, among others, that our yeast beta glucan products include inadequate instructions for use or inadequate warnings concerning possible side effects and interactions with other substances. A product recall or liability claim against us could result in increased costs and could adversely affect our reputation with our customers, which, in turn, could have an adverse effect on our business, financial condition and results of operations.

We currently do not maintain product liability insurance coverage. Product liability insurance is expensive, is subject to deductibles and coverage limitations, and may not be available to us in the future. In addition, we cannot be sure that we will be able to obtain or maintain insurance coverage at acceptable costs or in a sufficient amount, that our insurer will not disclaim coverage as to a future claim or that a product liability claim would not otherwise adversely affect our business, financial condition and results of operations. The cost of any product liability litigation or other proceeding, even if resolved in our favor, could be substantial. Uncertainties resulting from the initiation and continuation of product liability litigation or other proceedings could have an adverse effect on our ability to compete in the marketplace. Product liability litigation and other related proceedings may also require significant management attention.

We derive a substantial part of our sales from two major customers. If we lose either of these customers, or they reduce the amount of business they do with us, or if they fail to meet their obligations to us, our sales, financial condition and results of operations would be adversely affected.

Our largest customer, Michel Mercier Products, Inc. (d/b/a M.M.P, Inc.) (“MMP”), accounted for 79% of our sales in 2014 and 77% of our sales in 2013. Our relationship with MMP is governed by a written contract, which is subject to a confidentiality agreement. The initial term of our contract with MMP will expire on December 19, 2016. Pursuant to its terms, the written contract will be automatically renewed for continuous one-year periods unless either party gives notice of its intent to terminate at least 90 days prior to the expiration of any renewal term. Additionally, our second largest customer accounted for 12% of our sales in 2014 and 9% of our sales in 2013. If we lose either of these customers or they reduce the amount of business they do with us, our sales and profitability would be adversely affected. In addition, we are subject to credit risk due to concentration of our trade accounts receivables, and the inability of either of these customers to meet their obligations to us would adversely affect our financial results. At December 31, 2014 accounts receivable from MMP amounted to 100% of total accounts receivable, and at December 31, 2013 MMP accounted for 70% of accounts receivable. Although we are making efforts to reduce our dependency on a limited number of customers, we believe this concentration of sales to two customers will continue in the near future. If we lose either of these customers or they reduces the amount of business they does with us, or if they fail to meet their obligations to us, our sales, financial condition and results of operations would be adversely affected.

Our yeast beta glucan products face various forms of competition from other products in the marketplace, which could adversely affect our market share and result in a decrease in our future sales and earnings.

The pharmaceutical and biotechnology industries are characterized by intense competition, rapid product development and technological change. Most of the competition that our yeast beta glucan products face comes from companies that are larger and more well established, with greater financial, marketing, sales and technological resources than we have. Our products compete with a range of consumer and nutraceutical products. Our commercial success will depend on our ability to compete effectively in marketing and product development areas including, but not limited to, sales and branding, product safety, efficacy, ease-of-use, customer compliance, price, marketing and distribution. There can be no assurance that competitors will not succeed in developing and marketing products that are more desirable or effective than our products or that would render our products obsolete and non-competitive.

We may, in the future, be subject to risks of doing business internationally as we attempt to expand our sales through international consulting and distributor relationships.

We anticipate entering into international consulting and distributor agreements for our yeast beta glucan products. As a result, we expect to increase our revenues from international sales. A number of factors can prevent international sales, or substantially increase the cost of international sales, and we may encounter certain risks of doing business internationally including the following:

- increased government regulation of the processing, formulation, packaging, labeling and advertising of our consumer products for international markets;
- reduced protection and enforcement for our intellectual property rights;
- unexpected changes in, or impositions of, legislative or regulatory requirements that may limit our ability to sell our products and repatriate funds to the U.S.;
- political and economic instability;
- fluctuations in foreign currency exchange rates;
- difficulties in developing and maintaining distributor relationships in foreign countries;

- difficulties in negotiating acceptable contractual terms and enforcing contractual obligations;
- exposure to liabilities under the U.S. Foreign Corrupt Practices Act;
- potential trade restrictions and exchange controls;
- creditworthiness of foreign distributors, customer uncertainty and difficulty in foreign accounts receivable collection; and
- the burden of complying with foreign laws.

As we attempt to expand our sales internationally, our exposure to these risks could result in our inability to attain the anticipated benefits of expanding internationally and our business could be adversely impacted. Our success will depend, in large part, on our ability to anticipate and effectively manage these and other risks associated with our international operations. However, any of these factors could adversely affect our international operations and, consequently, our operating results.

A material disruption at our manufacturing facilities in Kentucky could result in material delays, quality control issues, increased costs and loss of business opportunities, which may negatively impact our sales and financial results.

We rely on our manufacturing facilities in Kentucky to operate our business and produce our yeast beta glucan. Our manufacturing facilities, or any of our machines within our otherwise operational facilities, could cease operations or no longer comply with current GMP guidelines unexpectedly due to a number of events, including prolonged power or equipment failures, disruptions in the transportation infrastructure, fires, floods or other catastrophes. If our manufacturing facilities no longer comply with GMP, our products may be deemed adulterated under U.S. regulations and subject to recall. Furthermore, a significant majority of our raw material product inventory is located in our Kentucky facility. If any material amount of our inventory were damaged as a result of a material disruption, we would be unable to meet our contractual obligations. While we seek to operate our manufacturing facilities in compliance with applicable rules and regulations and take measures to minimize the risks of disruption at our facilities, any such material disruption at our facilities could prevent us from meeting customer demand, reduce our sales and negatively impact our financial results.

If we lose our President, or are unable to attract and retain additional qualified personnel, the quality of our products may decline and our business may be adversely affected.

We rely heavily on the expertise, experience and continued services of our President, Mark McLaughlin. Loss of his services could adversely affect our ability to achieve our business objectives, if we are unable to find a suitable replacement. Mr. McLaughlin is an integral factor in establishing relationships and the continued development of our business depends upon his continued employment. If he were to resign or retire, we would have to find a suitable replacement who shared his expertise and relationships. Any delay in finding a suitable replacement would adversely affect the pace at which we are able to successfully grow our business and could harm our existing business, resulting in a decrease in sales and revenue. We have entered into an employment agreement with Mr. McLaughlin that includes provisions for non-competition and confidentiality that expires in October 2017.

We believe our future success will depend upon our ability to retain key employees and our ability to attract and retain other skilled personnel and consultants. While we have been able to find a sufficient number of skilled personnel consistent with our growth to date, we cannot guarantee that any employee will remain employed by us for any period of time or that we will be able to attract, train or retain qualified personnel in the future consistent with our growth. Such loss of personnel could have a material adverse effect on our business and company. Furthermore, we may need to employ additional personnel to expand our business. Qualified employees and consultants in the dietary supplement industry are in great demand and may be unavailable in the time frame required to satisfy our customers' requirements. There is no assurance we will be able to attract and retain sufficient numbers of highly skilled employees in the future. The loss of personnel or our inability to hire or retain sufficient personnel at competitive rates could impair the growth of our business.

Current and future economic and market conditions could adversely affect demand for our products.

The U.S. economy and the global economy are recovering from a severe recession. Factors such as uncertainties in consumer spending, a sustained regional and global economic downturn or slow recovery may reduce the demand for our yeast beta glucan products. Furthermore, challenging economic conditions also may impair the ability of our customers to pay for our commercial, direct-to-consumer products. Consumer spending for our yeast beta glucan products generally is considered a discretionary purchase because they are non-prescription nutraceutical supplements and nutricosmetics, and we may experience a more negative impact on our business due to these conditions than other companies that do not depend on discretionary spending. If demand for our products declines or our customers are otherwise unable to pay for our products, we may be required to offer extensive discounts or spend more on marketing than budgeted and our revenues, expense levels and profitability will be adversely affected.

We need additional capital to continue to conduct our business, execute our business plan and fund operations. We may not be able to obtain such capital on acceptable terms or at all.

In connection with the development and expansion of our business, we incur significant capital and operational expenses. We believe that we can increase our sales and net income by implementing a growth strategy that focuses on (i) diversifying revenues to include greater direct-to-consumer and healthcare professional sales and (ii) expanding our distribution to Europe and Asia. To implement our growth strategy, we anticipate (i) increasing our marketing to healthcare professionals and end consumers, (ii) entering into distribution agreements with manufacturers and formulators in Europe and Asia and (iii) developing our branded product lines.

Our existing capital resources and cash flows from operations are not adequate to satisfy the liquidity requirements of our business for the next 12 months. We plan on our operating business (in conjunction with our short term non-dilutive borrowing in the first quarter of 2015) to be able to fund operations through the first half of 2015. However, if available funds are not sufficient to meet our current operating expenses or plans for expansion, we plan to pursue alternative financing arrangements, including bank loans, advances from our directors and officers or funds raised through offerings of our equity or debt. Our ability to obtain additional capital on acceptable terms or at all is subject to a variety of uncertainties, including: investors' perceptions of, and demand for, companies in our industry; conditions of the U.S. and other capital markets in which we may seek to raise funds; our future results of operations, financial condition and cash flows; and economic, political and other conditions in the U.S.

There is no assurance we will be successful in locating a suitable financing transaction in a timely fashion or at all. In addition, there is no assurance we will obtain the capital we require by any other means. Future financings through equity investments are likely to be dilutive to our existing shareholders. Also, the rights and preferences of securities we may issue in future capital transactions may be more favorable for our new investors. Newly-issued securities may include preferences or superior voting rights, be combined with the issuance of warrants or other derivative securities, or be the issuances of incentive awards under equity employee incentive plans, which may have additional dilutive effects. Furthermore, we may incur substantial costs in pursuing future capital and financing, including investment banking fees, legal fees, accounting fees, printing and distribution expenses and other costs. We may also be required to recognize non-cash expenses in connection with certain securities we may issue, such as convertible notes and warrants, which will adversely impact our financial condition.

If we cannot raise additional funds on favorable terms or at all, we may not be able to carry out all or parts of our strategy to maintain our growth and competitiveness or to continue operations.

We may not be able to protect our proprietary rights adequately, which could adversely affect our competitive position and reduce the value of our products and brands, and litigation to protect our intellectual property rights may be costly.

We attempt to strengthen and differentiate our products by developing new and innovative yeast beta glucan products and manufacturing processes. As a result, our patents, trademarks and other intellectual property rights are important assets to our business. Our success will depend in part on our ability to obtain and protect our products, methods, processes and other technologies, to preserve our trade secrets, and to operate without infringing on the proprietary rights of third parties in the U.S. and other international markets. Despite our efforts, any of the following may reduce the value of our owned and used intellectual property:

- issued patents and trademarks that we own or have the right to use may not provide us with any competitive advantages;
- our efforts to protect our proprietary rights may not be effective in preventing misappropriation of our intellectual property;
- our efforts may not prevent the development and design by others of products or technologies similar to or competitive with, or superior to those we use or develop;
- another party may obtain a blocking patent and we would need to either obtain a license or design around the patent in order to continue to offer the contested feature in our products or services; or
- we may not have the financial resources to aggressively protect our intellectual property.

Policing the unauthorized use of our proprietary technology can be difficult and expensive. Litigation might be necessary to protect our intellectual property rights, which may be costly and may divert our management's attention away from our core business. Furthermore, there is no guarantee that litigation would result in an outcome favorable to us. To date, we have no knowledge of any infringement of our intellectual property by third parties. If we are unable to protect our proprietary rights adequately, it would have a negative impact on our operations.

We may be subject to claims that we have infringed the proprietary rights of others, which could require us to obtain a license or otherwise change our manufacturing processes or product offerings.

Although we do not believe any of our products or manufacturing processes infringe upon the proprietary rights of others, there is no assurance that infringement or invalidity claims, or claims for indemnification resulting from infringement claims, will not be asserted or prosecuted against us or that any such assertions or prosecutions will not have a material adverse effect on our business. To date, we are not aware of any material infringement nor have we been put on notice by third parties of any material infringement of proprietary rights of others. Regardless of whether any such claims are valid or can be asserted successfully, defending against such claims could cause us to incur significant costs and could divert resources away from our other activities. In addition, assertion of infringement claims could result in injunctions that prevent us from distributing our products. If any claims or actions are asserted against us, we may seek to obtain a license to the intellectual property rights that are in dispute. Such a license may not be available on reasonable terms, or at all, which could force us to change our manufacturing processes or product offerings.

We incur significant costs as a result of our operating as a public reporting company and our management's requirement to devote substantial time to new compliance initiatives, which may adversely affect our business and results of operations.

While we are a public company quoted on the OTC Markets-OTCQB, our compliance costs prior to the effectiveness of our registration statement were not substantial in light of our limited operations and limited public reporting obligations. As a company subject to public reporting requirements under the Securities Exchange Act of 1934, as amended, or the Exchange Act, since May 2012 we have incurred increased legal, accounting and other expenses. The costs of preparing and filing annual, quarterly and current reports and other information with the SEC and furnishing audited reports to shareholders is time-consuming and costly, and may adversely affect our business and results of operations.

It will also be time-consuming, difficult and costly for us to develop and implement the internal controls and reporting procedures required by the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act. Our management has limited or no experience operating a company subject to the rules and reporting practices required by the federal securities laws and applicable to a publicly traded company. Our management currently relies in many instances on the professional experience and advice of third parties including our attorneys and accountants. Our current management and staff will need to be trained and we will need to retain additional financial reporting, internal control and other personnel in order to develop and implement appropriate accounting, internal controls and reporting procedures.

Due to our financial condition, we have not been able to implement and maintain an effective system of internal controls, and we may not be able to report our financial results accurately. Any inability to report and file our financial results accurately and timely could harm our business and adversely affect the trading price of our common stock.

We are required to establish and maintain internal controls over financial reporting and disclosure controls and procedures and to comply with other requirements of the Sarbanes-Oxley Act and the rules promulgated by the SEC. Our management will need to include a report on our internal control over financial reporting and its assessment on whether such internal controls were effective for the prior fiscal year with our annual reports that we file under the Exchange Act with the SEC. Under current federal securities laws, our management has concluded that our internal control over financial reporting is not effective.

However, for as long as we remain an “emerging growth company,” or EGC, as defined in the Jumpstart our Business Startups Act of 2012, or JOBS Act, we may, and we intend to, take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not EGCs, including not being required to comply with the auditor attestation requirements concerning management’s reports on effectiveness of internal controls over financial reporting otherwise required under the Sarbanes-Oxley Act and the rules promulgated by the SEC. We may, and we intend to, take advantage of these reporting exemptions until we are no longer an EGC. We will cease to be an EGC at the earliest of (A) the last day of the fiscal year in which we have total annual gross revenues of \$1,000,000,000 (as indexed for inflation in the manner set forth in the JOBS Act) or more; (B) the last day of the fiscal year in which the fifth anniversary of the date of the first sale of our common stock pursuant to an effective registration statement under the Securities Act occurs, which will be 2017; (C) the date on which we have, during the previous 3-year period, issued more than \$1,000,000,000 in non-convertible debt; or (D) the date on which we are deemed to be a “large accelerated filer,” as defined in Rule 12b-2 under the Exchange Act or any successor thereto.

If we cease to be an EGC, as of each fiscal year end thereafter, our independent registered public accounting firm will be required to evaluate and report on our internal controls over financial reporting in the event we become an accelerated filer or large accelerated filer. To the extent we find material weaknesses or other deficiencies in our internal controls, we may determine that we have ineffective internal controls over financial reporting as of any particular fiscal year end, and we may receive an adverse assessment of our internal controls over financial reporting from our independent registered public accounting firm. Moreover, any material weaknesses or other deficiencies in our internal controls may delay the conclusion of an annual audit or a review of our quarterly financial results.

Our management has limited or no experience operating as a public reporting company under the Exchange Act or establishing the level of internal control over financial reporting required by the Sarbanes-Oxley Act. Our management currently relies in many instances on the professional experience and advice of third parties including our attorneys and accountants.

We have material weaknesses in our internal control over financial reporting.

We identified material weaknesses in internal control over financial reporting for the years ended December 31, 2014 and 2013. Under standards established by the Public Company Accounting Oversight Board, a deficiency in internal control over financial reporting exists when the design or operation of a control does not allow management or personnel, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A material weakness is a deficiency or combination of deficiencies in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected and corrected on a timely basis. We plan to remediate the material weaknesses identified by us when we have sufficient funds to do so; however, we cannot assure you that there will not be additional material weaknesses and significant deficiencies that we will identify. If we are unable to identify such issues or if we are unable to produce accurate and timely financial statements, our stock price may be adversely affected and we may be unable to maintain compliance with applicable securities laws.

We believe that the material weaknesses did not have an effect on the reporting of the Company's financial results. However, we believe that the lack of a functioning audit committee and lack of a majority of outside directors on the Company's board of directors, results in ineffective oversight of the establishment and monitoring of required internal controls and procedures.

Risks Related to Our Securities

Our stock price may be volatile or may decline regardless of our operating performance, and you may lose part or all of your investment.

The market price of our common stock may fluctuate widely in response to various factors, some of which are beyond our control, including:

- market conditions or trends in the dietary supplement industry or in the economy as a whole;
- actions by competitors;
- actual or anticipated growth rates relative to our competitors;
- the public's response to press releases or other public announcements by us or third parties, including our filings with the SEC;
- economic, legal and regulatory factors unrelated to our performance;
- any future guidance we may provide to the public, any changes in such guidance or any difference between our guidance and actual results;
- changes in financial estimates or recommendations by any securities analysts who follow our common stock;
- speculation by the press or investment community regarding our business;
- litigation;
- changes in key personnel; and
- future sales of our common stock by our officers, directors and significant shareholders.

In addition, the stock markets, including the over-the-counter markets where we are quoted, have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. These broad market fluctuations may materially affect our stock price, regardless of our operating results. Furthermore, the market for our common stock historically has been limited and we cannot assure you that a larger market will ever be developed or maintained. The price at which investors purchase shares of our common stock may not be indicative of the price that will prevail in the trading market. Market fluctuations and volatility, as well as general economic, market and political conditions, could reduce our market price. As a result, these factors may make it more difficult or impossible for you to sell our common stock for a positive return on your investment. In the past, shareholders have instituted securities class action litigation following periods of market volatility. If we were involved in securities litigation, we could incur substantial costs and our resources and the attention of management could be diverted from our business.

Shares of our common stock lack a significant trading market, which could make it more difficult for an investor to sell our common stock.

Shares of our common stock are not yet eligible for trading on any national securities exchange. Our common stock currently is quoted in the over-the-counter market on the OTC Markets-OTCQB. This market tends to be highly illiquid. There is no assurance that an active trading market in our common stock will develop, or if such a market develops, that it will be sustained. In addition, there is a greater chance for market volatility for securities quoted in the over-the-counter markets as opposed to securities traded on a national exchange. This volatility may be caused by a variety of factors, including the lack of readily available quotations, the absence of consistent administrative supervision of “bid” and “ask” quotations and generally lower trading volume. As a result, an investor may find it more difficult to dispose of, or to obtain accurate quotations as to the market value of, our common stock, or to obtain coverage for significant news events concerning us, and our common stock could become substantially less attractive for investment by financial institutions, as consideration in future capital raising transactions or for other purposes.

Future sales of shares of our common stock, or the perception in the public markets that these sales may occur, may depress our stock price.

The market price of our common stock could decline significantly as a result of sales of a large number of shares of our common stock. In addition, if our significant shareholders sell a large number of shares, or if we issue a large number of shares, the market price of our stock could decline. Any issuance of additional common stock by us in the future, or warrants or options to purchase our common stock, if exercised, would result in dilution to our existing shareholders. Such issuances could be made at a price that reflects a discount or a premium to the then-current trading price of our common stock. Moreover, the perception in the public market that shareholders might sell shares of our stock or that we could make a significant issuance of additional common stock in the future could depress the market for our shares. These sales, or the perception that these sales might occur, could depress the market price of our common stock or make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate.

We have issued shares of common stock and warrants and options to purchase shares of our common stock in connection with our private placement and certain employment, director and consultant agreements. In addition, we issued shares of our common stock, and options and warrants to purchase shares of our common stock, in financing transactions and pursuant to employment agreements that are deemed to be “restricted securities,” as that term is defined in Rule 144 promulgated under the Securities Act. From time to time, certain of our shareholders may be eligible to sell all or some of their restricted shares of common stock by means of ordinary brokerage transactions in the open market pursuant to Rule 144, subject to certain limitations. The resale pursuant to Rule 144 of shares acquired from us in private transactions could cause our stock price to decline significantly.

We could issue additional common stock, which might dilute the book value of our common stock.

Our Board of Directors has authority, without action or vote of our shareholders, to issue all or a part of our authorized but unissued shares. Our amended certificate of incorporation authorizes the issuance of up to 50,000,000 shares of common stock, par value \$0.01 per share. As of March 30, 2015, there were 5,162,307 authorized and unissued shares of our common stock available for future issuance, based on 30,729,973 shares of our common stock outstanding and our reservation of 3,772,720 shares of our common stock issuable upon exercise of outstanding warrants and 10,335,000 shares of our common stock issuable upon exercise of options outstanding and exercisable. Although we have no commitments as of the date hereof to issue any securities, we may issue a substantial number of additional shares of our common stock or debt securities to complete a business combination or to raise capital. Such stock issuances could be made at a price that reflects a discount or a premium from the then-current trading price of our common stock. In addition, in order to raise capital, we may need to issue securities that are convertible into or exchangeable for a significant amount of our common stock. These issuances would dilute your percentage ownership interest, which would have the effect of reducing your influence on matters on which our shareholders vote, and might dilute the book value of our common stock. You may incur additional dilution if holders of stock options and warrants, whether currently outstanding or subsequently granted, exercise their options or warrants to purchase shares of our common stock.

We are an EGC, and we cannot be certain if the reduced disclosure requirements applicable to EGCs will make our common stock less attractive to investors.

We are an EGC, as defined in the JOBS Act, and we may take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not EGCs. The modified disclosure requirements available to EGCs include reduced disclosure about our executive compensation and omission of a compensation discussion and analysis, which is also available to us as a smaller reporting company, and an exemption from the requirement of holding a nonbinding advisory vote on executive compensation and the requirement that shareholders approve any golden parachute payments not previously approved. In addition, we will not be subject to certain requirements of Section 404 of the Sarbanes-Oxley Act, including the additional testing of our internal control over financial reporting as may occur when outside auditors attest as to our internal controls over financial reporting, which is also not required of smaller reporting companies. We could be an emerging growth company for up to five years, although we could lose that status sooner if our revenues exceed \$1 billion, if we issue more than \$1 billion in non-convertible debt in a three year period, or if the market value of our common stock exceeds \$700 million.

We cannot predict if investors will find our common stock less attractive because we may rely on these exemptions. If some investors find our common stock less attractive as a result, there may be a less active trading market for our common stock, and our stock price may be more volatile.

Although the JOBS Act permits an EGC such as us to take advantage of an extended transition period to comply with new or revised accounting standards applicable to public companies, we are choosing to “opt out” of this provision, and, as a result, we will comply with new or revised accounting standards as required when they are adopted, however do not currently believe that this will have a material effect on the preparation of our financial statements. This decision to opt out of the extended transition period under the JOBS Act is irrevocable.

The application of the “penny stock” rules could adversely affect the market price of our common stock and increase your transaction costs to sell those shares.

Our common stock may be subject to the “penny stock” rules adopted under Section 15(g) of the Exchange Act. The penny stock rules apply to issuers whose common stock does not trade on a national securities exchange and trades at less than \$5.00 per share, or that have a tangible net worth of less than \$5,000,000 (\$2,000,000 if the company has been operating for three or more years). The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules, to deliver a standardized risk disclosure document prepared by the SEC that contains the following information:

- a description of the nature and level of risk in the market for penny stocks in both public offerings and secondary trading;
- a description of the broker’s or dealer’s duties to the customer and of the rights and remedies available to the customer with respect to violation to such duties or other requirements of securities laws;
- a brief, clear, narrative description of a dealer market, including “bid” and “ask” prices for penny stocks and the significance of the spread between the “bid” and “ask” prices;
- a toll-free telephone number for inquiries on disciplinary actions;
- definitions of any significant terms in the disclosure document or in the conduct of trading in penny stocks; and
- such other information and is in such form (including language, type, size and format), as the SEC shall require by rule or regulation.

Prior to effecting any transaction in a penny stock, the broker-dealer also must provide the customer with the following information:

- bid and offer quotations for the penny stock;
- compensation of the broker-dealer and our salesperson in the transaction;
- number of shares to which such bid and ask prices apply, or other comparable information relating to the depth and liquidity of the market for such stock; and
- monthly account statements showing the market value of each penny stock held in the customer's account.

The penny stock rules further require that, prior to a transaction in a penny stock not otherwise exempt from those rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written acknowledgment of the receipt of a risk disclosure statement, a written agreement to transactions involving penny stocks and a signed and dated copy of a written suitability statement.

Due to the requirements of the penny stock rules, many broker-dealers have decided not to trade penny stocks. As a result, the number of broker-dealers willing to act as market makers in such securities is limited. If we remain subject to the penny stock rules for any significant period, it could have an adverse effect on the market, if any, for our securities. Moreover, if our securities are subject to the penny stock rules, investors will find it more difficult to dispose of our securities.

Our principal shareholder has the ability to exert significant control in matters requiring a shareholder vote and could delay, deter or prevent a change of control in our company.

As of March 30, 2015, Mark McLaughlin, our President and largest shareholder, beneficially owned 30.5% of our outstanding shares of common stock. In addition, Mr. McLaughlin has from time to time made advances us to support our ongoing capital needs. Mr. McLaughlin exerts significant influence over us, giving him the ability, among other things, to exercise significant control over the election of all or a majority of the Board of Directors and to approve significant corporate transactions. Such share ownership and control may also have the effect of delaying or preventing a future change in control, impeding a merger, consolidation, takeover or other business combination, or discouraging a potential acquirer from making a tender offer or otherwise attempting to obtain control of our company. This, in turn, could have a negative effect on the market price of our common stock. It could also prevent our shareholders from realizing a premium over the market price for their shares of common stock. Without the consent of Mr. McLaughlin, we could be prevented from entering into potentially beneficial transactions if such transactions conflict with our principal shareholder's interests.

We do not anticipate paying dividends in the foreseeable future, and, accordingly, any return on investment may be limited to the value of our common stock.

We do not anticipate paying cash dividends on our common stock in the foreseeable future. The payment of dividends on our common stock will depend on earnings, financial condition and other business and economic factors affecting it at such time as the Board of Directors may consider relevant. We intend to follow a policy of retaining all of our earnings to finance the development and execution of our strategy and the expansion of our business. If we do not pay dividends, our common stock may be less valuable because a return on your investment will occur only if our stock price appreciates.

Our common stock is not registered under the Exchange Act and, as a result, we will not be subject to the federal proxy rules and our directors, executive officers and 10% beneficial holders will not be subject to Section 16 of the Exchange Act. In addition, our reporting obligations under Section 15(d) of the Exchange Act may be suspended automatically if we have fewer than 300 holders of record on the first day of our fiscal year.

Shares of our common stock are not currently registered under the Exchange Act though we may register our common stock under the Exchange Act in the foreseeable future. We will have to register our common stock under the Exchange Act if we have, after the last day of our fiscal year, holders of record of more than either (1) 2,000 or more persons or (2) 500 or more persons who are not accredited investors, in accordance with Section 12(g) of the Exchange Act, as amended by the JOBS Act. As a result, currently we are only subject solely to the reporting obligations of Section 15(d) of the Exchange Act so long as we do not subsequently register under Section 12(g) of the Exchange Act by filing a Form 8-A or another Exchange Act registration statement. As long as our common stock is not registered under the Exchange Act, we will be required to file only annual, quarterly and current reports pursuant to Section 15(d) of the Exchange Act, and we will not be subject to Section 14 of the Exchange Act, which, among other things, prohibits companies that have securities registered under the Exchange Act from soliciting proxies or consents from shareholders without furnishing to shareholders and filing with the SEC a proxy statement and form of proxy complying with the proxy rules. In addition, so long as our common shares are not registered under the Exchange Act, our directors, executive officers and beneficial holders of 10% or more of our outstanding common stock will not be subject to Section 16 of the Exchange Act. Section 16(a) of the Exchange Act requires directors, executive officers and persons who beneficially own more than 10% of a registered class of equity securities to file with the SEC initial statements of beneficial ownership, reports of changes in ownership and annual reports concerning their ownership of common stock and other equity securities on Forms 3, 4 and 5, respectively. Such information about our directors, executive officers and 10% beneficial holders will only be available through this and any subsequent registration statement or periodic reports we file pursuant to Section 15(d) of the Exchange Act.

Furthermore, so long as our common stock is not registered under the Exchange Act, our obligation to file reports under Section 15(d) of the Exchange Act will be automatically suspended if, on the first day of any fiscal year, other than a fiscal year in which a registration statement under the Securities Act has gone effective, we have fewer than 300 holders of record. This suspension is automatic and does not require any filing with the SEC. In such an event, we may cease providing periodic reports and current or periodic information, including operational and financial information. As of March 30, 2015, we had approximately 328 holders of record.

Certain provisions of our corporate governance documents and Delaware law could discourage, delay or prevent a merger or acquisition at a premium price.

Our amended certificate of incorporation and bylaws contain provisions that may make the acquisition of our company more difficult without the approval of our Board of Directors. These include provisions that:

- provide that our Board of Directors is expressly authorized to adopt, amend or repeal our bylaws;
- provide our Board of Directors with the sole power to set the size of our Board of Directors and fill vacancies; and
- provide that special meetings of shareholders may be called only by our Board of Directors, Chairman of the Board of Directors, upon written notice of demand by our President or upon written notice of demand by the holders of at least 25% of the shares of our common stock outstanding and entitled to vote.

These and other provisions of our amended certificate of incorporation and bylaws could delay, defer or prevent us from experiencing a change of control or changes in our Board of Directors and management and may adversely affect our shareholders' voting and other rights.

In addition, we are subject to Section 203 of the Delaware General Corporation Law, which generally prohibits a Delaware corporation from engaging in any of a broad range of business combinations with a shareholder owning 15% or more of such corporation's outstanding voting stock for a period of three years following the date on which such shareholder became an "interested" shareholder. In order for us to consummate a business combination with an "interested" shareholder within three years of the date on which the shareholder became "interested," either (1) the business combination or the transaction that resulted in the shareholder becoming "interested" must be approved by our board of directors prior to the date the shareholder became "interested," (2) the "interested" shareholder must own at least 85% of our outstanding voting stock at the time the transaction commences (excluding voting stock owned by directors who are also officers and certain employee stock plans) or (3) the business combination must be approved by our board of directors and authorized by at least two-thirds of our shareholders (excluding the "interested" shareholder). This provision could have the effect of delaying or preventing a change of control, whether or not it is desired by or beneficial to our shareholders. Any delay or prevention of a change of control transaction or changes in our board of directors and management could deter potential acquirers or prevent the completion of a transaction in which our shareholders could receive a substantial premium over the then-current market price for their shares of our common stock.

Item 1B. Unresolved Staff Comments

Not required.

Item 2. Properties

Our principal executive offices are in office space provided at no cost to us by our President in Mount Kisco, New York. We lease a manufacturing facility with warehouse space consisting of approximately 15,000 square feet in Florence, Kentucky, in the vicinity of the Cincinnati, Ohio, airport. The lease expires on May 31, 2016. We believe that our existing office and manufacturing facilities are adequate for current and presently foreseeable operations. In general, our properties are well maintained and are being utilized for their intended purposes.

Item 3. Legal Proceedings

In October 2013, the Company agreed to a judgment against the estate of a former officer and related individuals in connection with a judgment in favor of the Company rendered in June 2000 that found that the defendants in question had failed to use their best efforts in support of the Company in violation of an agreement between the defendants and the Company. On March 12, 2014, a settlement was reached with these parties in the amount of \$386,000. During the year ended December 31, 2013, the Company received net proceeds of \$78,000 and the balance, \$132,000 net of related legal costs, in March 2014.

We may become involved in various lawsuits and legal proceedings arising in the ordinary course of business. Litigation is subject to inherent uncertainties and an adverse result in these or other matters may arise from time to time that may have an adverse effect on our business, financial conditions or operating results. We are currently not aware of any such legal proceedings or claims that will have, individually or in the aggregate, a material adverse effect on our business, financial condition or operating results.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is qualified for quotation on the OTC Markets-OTCQB under the symbol "IMMD" and has been quoted on the OTCQB since February 8, 2013. Previously, our common stock was quoted on the OTC Markets-OTC Pink Current, also under the symbol "IMMD." The following table sets forth the range of the high and low bid prices per share of our common stock for each quarter (or portion thereof) as reported in the over-the-counter markets. These quotations represent interdealer prices, without retail markup, markdown or commission, and may not represent actual transactions. There currently is no liquid trading market for our common stock. There can be no assurance that a significant active trading market in our common stock will develop, or if such a market develops, that it will be sustained.

	2014		2013	
	High	Low	High	Low
First Quarter (through March 31)	\$ 0.32	\$ 0.20	\$ 0.18	\$ 0.10
Second Quarter (through June 30)	0.25	0.08	0.41	0.09
Third Quarter (through September 30)	0.13	0.06	0.30	0.15
Fourth Quarter (through December 31)	0.14	0.07	0.41	0.21

Holders of Record

On March 30, 2015, there were approximately 328 shareholders of record based on information provided by our transfer agent. Many of our shares of common stock are held in street or nominee name by brokers and other institutions on behalf of shareholders and we are unable to estimate the total number of shareholders represented by these record holders.

Dividend Policy

We have not paid and do not expect to declare or pay any cash dividends on our common stock in the foreseeable future. We currently expect to retain all future earnings for use in the operation and expansion of our business. The declaration and payment of any cash dividends in the future will be determined by our Board of Directors, in its discretion, and will depend on a number of factors, including our earnings, capital requirements, overall financial condition and contractual restrictions, if any.

Private Placement

From November 21 to November 23, 2013, the Company sold an aggregate of 500,000 shares of its common stock at \$0.25 per share in a non-brokered private placement to accredited investors in reliance on an exemption from registration under Section 4(2) of the Securities Act. Each two shares of common stock issued in the private placement included a three-year warrant to purchase one share exercisable at \$0.40 per share.

Item 6. Selected Financial Data

Not required.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We manufacture, distribute and sell natural immune support products; namely proprietary yeast beta glucans which are natural extracts that have been shown through testing and analysis and scientific research to support the immune system. Yeast beta glucans are classified as generally recognized as safe ("GRAS") by the Food and Drug Administration ("FDA"). We are and have been a science driven company for more than 25 years. Our products are used in oral and topical applications. Historically, we have sold our proprietary additives, for both oral and topical use, primarily via business-to-business to large dietary supplement and cosmetic companies. We have also sold our own standalone product lines primarily on a word-of-mouth basis and through our website.

For the first time in our history, we hired a chief marketing officer in 2013, however, we experienced an overall decrease in sales in 2014 due to the lack of execution of plans to generate new business. Late in the second quarter of 2014, the aforementioned chief marketing officer resigned. We hired three senior marketing executives late in the fourth quarter of 2014 (and early in 2015). We have performance based contracts with these executives, allowing us to continue to maintain a relatively low overhead. Our priority is to actively pursue opportunities to market our products and increase sales.

Our plans are to increase sales on our oral and topical-use products for healthcare professionals, distributors and direct-to-consumer sales. We expect that a significant component of our selling, general and administration expenses going forward will continue to consist of marketing and advertising expenses to increase our sales. The primary components of our marketing and advertising expenses may include online sales promotions through our website, trade advertising, direct marketing to nutraceutical companies and industry associations, consumer research and search engine and digital advertising. We expect our selling, general and administrative expenses to increase in absolute dollars as we incur increased costs related to our marketing strategy. These costs, along with the additional costs resulting from our operations as a public reporting company, could continue to adversely impact our future results of operations.

Additional significant factors that we believe will affect our operating results going forward are: (i) protection of our intellectual property rights; (ii) imposition of more stringent government regulations of our products; (iii) lack of adequate capital to effectuate our business plans; and (iv) lack of experienced personnel.

We historically have expended a significant amount of our funds on obtaining and protecting our patents, trade secrets and proprietary products. We rely on the patent and trademark protection laws in the U.S. to protect our intellectual property and maintain our competitive position in the marketplace. For several years, we were involved in complex litigation regarding patents and licenses critical to our products. In 2010, we prevailed on all major legal matters and reached favorable settlements. If additional litigation becomes necessary to protect our intellectual property rights, such litigation may be costly, divert our management's attention away from our core business and have a negative impact on our operations. Furthermore, there is no guarantee that litigation would result in an outcome favorable to us.

In addition, yeast beta glucans are designated as GRAS under current FDA regulations. Future government regulations may prevent or delay the introduction or require the reformulation of our products. Some agencies, such as the FDA, could require us to remove a particular product from the market, delay or prevent the import of raw materials for the manufacture of our products or otherwise disrupt the marketing of our products. Any such government actions could result in additional costs to us, reduce growth prospects, lost sales from products that we are required to remove from the market and potential product liability litigation.

We have limited operating capital and have funded operations in the past through the sales of our products and loans and advances from Mark McLaughlin, our President, and other directors. In addition, in the first quarter of 2014 we received \$132,000 from a legal settlement that was used to fund our operations and on September 30, 2014, we borrowed \$50,000 pursuant to a short term loan agreement entered into with a private investor for our ongoing working capital needs. This short term loan agreement was paid in full on its maturity on November 14, 2014. In the first quarter of 2015, we entered into another non-dilutive short term loan agreement with an investor for \$100,000. With the proceeds from this loan, we plan on our operating business to be able to fund operations through the first half of 2015, however, in the event we require additional operating capital we will have to depend on sources other than operating revenues to meet our operating and capital needs. No assurance can be given that such sources will be available and no assurance can be given that Mr. McLaughlin or other directors who have in the past willingly funded operations will commit to do so in the future, or that we will be successful in our endeavors to raise additional capital. For additional information regarding these and other risks please see "Risk Factors" on page 10.

Results of Operations

Comparison of Years Ended December 31, 2014 and 2013

The following table sets forth the results of our operations for the years ended December 31, 2014 and 2013:

	2014		2013	
	\$	% of Sales	\$	% of Sales
Sales	714,158		808,363	
Cost of sales	172,850	24%	181,304	23%
Gross profit	541,308	76%	627,059	77%
Operating expenses	(1,072,187)	(150)%	(1,173,467)	(145)%
Loss from operations	(530,879)	(74)%	(546,408)	(68)%
Other income (expenses), net	53,194	7%	260,946	32%
Income tax benefit	17,200	3%	17,200	3%
Net loss	<u>(460,485)</u>	<u>(64)%</u>	<u>(268,262)</u>	<u>(33)%</u>

Sales in 2014 were \$0.71 million, a decrease of 12% from \$0.81 million in 2013. Our overall decrease in sales for 2014 was primarily due to the lack of execution of plans to generate new business. As a result, our chief marketing officer resigned during the year. In our last fiscal quarter (and in early 2015), we hired three senior marketing executives. We have performance based contracts with these executives, allowing us to continue to maintain a relatively low overhead. Our priority is to actively pursue opportunities to market our products and increase sales.

Cost of sales consists primarily of material costs, labor costs and related overhead directly attributable to the production of our products. Total cost of sales decreased slightly by 5% to \$0.17 million in 2014 compared to \$0.18 million in 2013 and was consistent with our expectations.

Gross profit decreased 14% to \$0.54 million in 2014 compared to \$0.63 million in 2013. Gross profit as a percentage of sales decreased slightly to 76% in 2014 from 77% in 2013 and was consistent with our expectations.

Operating expenses consisted of general and administrative expense, compensation and related expense and professional fees. Overall operating expenses decreased 9% to \$1.1 million in 2014 from \$1.2 million in 2013. General and administration expense decreased 5% to \$0.37 million in 2014 from \$0.39 million in 2013 due to the decrease in the Company's marketing expenses as a result of the lack of execution of plans to generate new business in 2014. Compensation and related expenses decreased 14% to \$0.56 million in 2014 from \$0.65 million in 2013, primarily as a result of the resignation of our chief marketing officer. Professional fees increased 9% to \$0.14 million in 2014 from \$0.13 million in 2013, as a result of additional legal fees we incurred in the 2014 period.

Other income (expense) (net) was approximately \$53,000 in 2014 compared with approximately \$261,000 in 2013, a decrease of \$208,000. The decrease is attributable to the fact that in the 2013 fiscal year the Company agreed to a judgment against the estate of a former officer and related individuals in connection with a judgment in favor of the Company rendered in June 2000, finding that defendants in question had failed to use their best efforts in support of the Company in violation of an agreement between them. On March 12, 2014, a settlement was reached with these parties in the amount of \$386,000. During the year ended December 31, 2013, the Company received net proceeds of \$78,000 and the balance, \$132,000, net of related legal costs, in March 2014.

Net loss in 2014 was \$0.46 million compared to a net loss of \$0.27 million in 2013, an increase of \$0.20 million or 72%. Net loss as a percentage of sales was 64% in 2014 compared to 33% in 2013. Our increased net loss was attributable to our decrease in sales, which was attributable to the lack of execution of plans to generate new business, matched with our consistent operating expenses.

Liquidity and Capital Resources

Our principal demands for liquidity are to increase sales, purchase inventory and for sales distribution and general corporate purposes. We incurred negative cash flows in the 2013 and 2014 fiscal years and had a negative net working capital position at December 31, 2014. As a result, our auditors have raised substantial doubt about our ability to continue as a going concern. We plan on our operating business (in conjunction with our short term non-dilutive borrowing in the first quarter of 2015) being able to fund operations through the first half of 2015. However, if necessary, we may raise additional capital through a private placement of common stock, obtaining debt financing or from advances from our President and/or directors.

In 2013 we raised \$175,000 through sales of our common stock in private placements, as well as proceeds from the exercise of stock option, and \$40,200 from notes payable to officers and directors. In the first quarter of 2014, we received \$132,000 pursuant to a legal settlement. On September 30, 2014, we borrowed \$50,000 pursuant to a short term loan agreement entered into with a private investor for our ongoing working capital needs which was repaid with cash on hand. During 2014 notes payable due to officer and other related individuals totaling \$30,000 were repaid and in the fourth quarter of 2014 we borrowed an additional \$17,000 from our President. At December 31, 2014 we had notes payable outstanding of \$27,200.

There can be no assurance that required future financing can be successfully completed on a timely basis, or on terms acceptable to us. Any future issuance of equity securities could cause dilution to our shareholders. Any incurrence of indebtedness would increase our debt service obligations and would cause us to be subject to restrictive operating and financial covenants.

Additionally, at December 31, 2014 one customer accounted for 100% of accounts receivable. We periodically perform a credit analysis and monitor the financial condition of this and other customers and do not foresee any difficulties in collecting our accounts receivable at this time.

Comparison of Years Ended December 31, 2014 and 2013

We had negative net working capital of approximately \$(170,000) at December 31, 2014, decrease from net working capital of approximately \$125,000 at December 31, 2013. The ratio of current assets to current liabilities was .4-to-1 at December 31, 2014.

The following is a summary of cash provided by or used in each of the indicated types of activities during the years ended December 31, 2014 and 2013:

	<u>2014</u>	<u>2013</u>
Cash provided by (used in):		
Operating activities	\$ 33,439	\$ (259,074)
Financing activities	(113,000)	315,200

Net cash flow provided by operating activities was \$33,439 in 2014 compared to net cash used in operating activities of \$259,074 in 2013. The increase in net cash inflow in operating activities was attributable primarily to the receipt of legal settlement proceeds in the amount of \$132,000.

Net cash flow used by financing activities was \$(113,000) in 2014 compared to \$315,200 provided by financing activities in 2013. In 2013, we received \$125,000 in a private placement of our common stock, \$50,000 through the exercise of options, a net increase in notes payable of \$94,200 and a \$100,000 signing fee related to a memorandum of understanding we entered into with Adiuvo Investment S.A (“Adiuvo”). This compares to 2014 where we repaid certain outstanding notes in the amount of \$80,000 and invested \$100,000 for a minority interest (less than 1%) in Adiuvo, which announced in December 2014 its intention to list its shares on the Warsaw (Poland) Exchange.

Private Placements

In 2013, we issued 500,000 shares of our common stock (and three-year warrants to purchase 250,000 shares) of our common stock at \$0.40 per share to accredited investors at \$0.25 per unit for \$125,000 in gross proceeds.

Indebtedness

From time to time, our directors, officers and other related individuals have made short-term advances to us for our operating needs. On November 26, 2014, we borrowed a total of \$17,000 from our President. In addition, on September 30, 2014, we borrowed \$50,000 pursuant to a short term loan agreement with a private investor which bore interest at 7% per annum. We repaid this note with cash on hand on November 14, 2014, the maturity date. During the year ended December 31, 2014, notes payable due to officer and other related individuals totaling \$30,000 were repaid. Interest expense on notes payable amounted to \$4,683 for the year ended December 31, 2014. At December 31, 2014, notes payable due to officers and other individuals totaled \$27,200.

We are subject to a royalty agreement pursuant to which we are required to pay a monthly royalty of 8% on all sales of certain skin care products up to \$227,175. At December 31, 2014, we included \$133,000 in accounts payable and accrued expenses relating to this royalty agreement, with the remaining commitment under the royalty agreement at approximately \$20,000. Our President, Mr. McLaughlin, has a 60% interest in the royalties paid under the agreement and has voluntarily deferred payments due without interest until, from time to time, we have the financial wherewithal to pay such royalties.

Legal Matters

In October 2013, the Company agreed to a judgment against the estate of a former officer and related individuals in connection with a judgment in favor of the Company rendered in June 2000, finding that defendants in question had failed to use their best efforts in support of the Company in violation of an agreement between them. On March 12, 2014, a settlement was reached with these parties in the amount of \$386,000. During the year ended December 31, 2013, the Company received net proceeds of \$78,000 and the balance, \$132,000, net of related legal costs, in March 2014.

Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements between us and any other entity that have, or are reasonably likely to have, a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to shareholders.

We have not entered into any financial guarantees or other commitments to guarantee the payment obligations of any third parties. We have not entered into any derivative contracts that are indexed to our shares and classified as stockholders' equity or that are not reflected in our consolidated financial statements. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. We do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or research and development services with us.

Critical Accounting Policies

While our significant accounting policies are described more fully in Note 2 to our financial statements, we believe the following accounting policies are the most critical to aid you in fully understanding and evaluating this management discussion and analysis.

Basis of Presentation and Use of Estimates

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the U.S., or U.S. GAAP. In preparing financial statements in conformity with U.S. GAAP, management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the dates of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Significant estimates required by management include the valuation of inventory and stockholders' equity-based transactions. Actual results could differ from those estimates.

Inventory

Inventory is valued at the lower of cost or market value with cost determined on a first-in, first-out basis. Management compares the cost of inventory with the net realizable value and an allowance is made for writing down their inventories to market value, if lower.

Revenue Recognition

The Company's policy is to record revenue as earned when a firm commitment, indicating sales quantity and price exists, delivery has taken place and collectability is reasonably assured. The Company generally records sales once the product is shipped to the customer. If applicable, provisions for discounts, returns, allowances, customer rebates and other adjustments are netted with gross sales. The Company accounts for such provisions during the same period in which the related revenues are earned. Customer discounts, returns and rebates have not been significant.

Delivery is considered to have occurred when title and risk of loss have transferred to the customer. Sales to international distributors are recognized in the same manner. If title does not pass until the product reaches the customer's delivery site, then recognition of revenue is deferred until that time. There are no formal sales incentives offered to any of the Company's customers. Volume discounts may be offered from time to time to customers purchasing large quantities on a per transaction basis. There are no special post shipment obligations or acceptance provisions that exist with any sales arrangements

Stock-based Compensation

The Company follows the provisions of ASC 718, "Share-Based Payment". Under this guidance compensation cost generally is recognized at fair value on the date of the grant and amortized over the respective vesting periods. The fair value of options at the date of grant is estimated using the Black-Scholes option pricing model. The expected option life is derived from assumed exercise rates based upon historical exercise patterns and represents the period of time that options granted are expected to be outstanding. The expected volatility is based upon historical volatility of our shares using weekly price observations over an observation period that approximates the expected life of the options. The risk-free rate approximates the U.S. Treasury yield curve rate in effect at the time of grant for periods similar to the expected option life. The estimated forfeiture rate included in the option valuation was zero.

Many of the assumptions require significant judgment and any changes could have a material impact in the determination of stock-based compensation expense.

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") 2014-09 "Revenue from Contracts with Customers" (Topic 606) ("ASU 2014-09"). ASU 2014-09 is a comprehensive new revenue recognition model requiring a company to recognize revenue to depict the transfer of goods or services to a customer at an amount reflecting the consideration it expects to receive in exchange for those goods or services. In adopting ASU 2014-09, companies may use either a full retrospective or a modified retrospective approach. ASU 2014-09 is effective for the first interim period within annual reporting periods beginning after December 15, 2016, and early adoption is not permitted. The Company will adopt ASU 2014-09 during the first quarter of fiscal 2017. Management is evaluating the provisions of this statement and has not determined what impact the adoption of ASU 2014-09 will have on the Company's financial position or results of operations.

In August 2014, the FASB issued ASU 2014-15, "Presentation of Financial Statements-Going Concern". This ASU is intended to define management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. It is effective for annual periods beginning after December 15, 2016, with early adoption permitted. The Company does not expect it to have a material effect on the Company's financial condition, results of operations, and cash flows.

All other accounting standards that have been issued or proposed by the FASB that do not require adoption until a future date are not expected to have a material impact on the financial statements upon adoption.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Not required.

Item 8. Financial Statements and Supplementary Data

Our financial statements, together with the report thereon, appear in a separate section of this Annual Report beginning on page F-1.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our Principal Executive Officer (“PEO”), who is also our Principal Financial Officer (“PFO”), of the design and effectiveness of our “disclosure controls and procedures” (as defined under Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on this evaluation, our PEO/PFO concluded that as of the end of the period covered by this report, these disclosure controls and procedures were not effective. The conclusion that our disclosure controls and procedures were not effective was due to the presence of the following material weaknesses in disclosure controls and procedures which are indicative of many small companies with small staff: (i) inadequate segregation of duties and effective risk assessment as the Company had only one officer; (ii) insufficient written policies and procedures for accounting and financial reporting with respect to the requirements and application of both US GAAP and SEC Guidelines; and (iii) inadequate security and restricted access to computer systems including insufficient disaster recovery plans; and (iv) no written whistleblower policy. Once sufficient funds are available, our PEO/PFO plans to implement appropriate disclosure controls and procedures to remediate these material weaknesses, including (i) appointing additional qualified personnel to address inadequate segregation of duties and ineffective risk management; (ii) adopt sufficient written policies and procedures for accounting and financial reporting and a whistleblower policy; and (iii) implement sufficient security and restricted access measures regarding our computer systems and implement a disaster recovery plan.

Management’s Annual Report on Internal Control over Financial Reporting

Our PEO/PFO is responsible for establishing and maintaining adequate internal control over financial reporting as defined under Rule 13a-15(f) and Rule 15d-15(f) under the Securities Exchange Act of 1934. As of December 31, 2014 our PEO/PFO assessed the effectiveness of the Company’s internal control over financial reporting based on the criteria for effective internal control set forth in the 1992 report entitled “Internal Control — Integrated Framework” published by the Committee of Sponsoring Organizations (“COSO”) of the Treadway Commission. Based on that evaluation, our PEO/PFO concluded that, during the period covered by this report, such internal controls and procedures were not effective to detect the inappropriate application of US GAAP rules as more fully described below. This was due to deficiencies that existed in the design or operation of our internal control over financial reporting that adversely affected our internal controls.

The matters involving internal controls and procedures that the Company’s PEO/PFO considered to be material weaknesses under the standards of the Public Company Accounting Oversight Board were: (1) lack of a functioning audit committee and lack of a majority of outside directors on the Company’s board of directors, resulting in ineffective oversight in the establishment and monitoring of required internal controls and procedures; (2) inadequate segregation of duties consistent with control objectives; (3) insufficient written policies and procedures for accounting and financial reporting with respect to the requirements and application of US GAAP and SEC disclosure requirements; and (4) ineffective controls over period end financial disclosure and reporting processes. The aforementioned material weaknesses were identified by the Company’s PEO/PFO in connection with his review of our financial statements as of December 31, 2014.

Our PEO/PFO believes that the material weaknesses set forth above did not have an effect on the Company’s financial results. However, our PEO/PFO believes that the lack of a functioning audit committee and lack of a majority of outside directors on the Company’s board of directors, results in ineffective oversight of the establishment and monitoring of required internal controls and procedures.

We will continue to monitor and evaluate the effectiveness of our internal controls and procedures and our internal controls over financial reporting on an ongoing basis and are committed to taking action and implementing additional enhancements or improvements as funds allow.

There have been no significant changes in our internal controls over financial reporting that occurred during the quarter ended December 31, 2014 that have materially affected or are reasonably likely to materially affect, our internal controls over financial reporting.

This annual report does not include an attestation report of the Company’s independent registered public accounting firm regarding internal control over financial reporting. Management’s report was not subject to attestation by the Company’s independent registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit the Company to provide only its management report in the Annual Report.

Item 9B. Other Information

Dr. Joseph V. DiTrolino

On September 4, 2014, Dr. Joseph V. DiTrolino was appointed to our Board of Directors. There is no arrangement or understanding between Dr. DiTrolino and any other person pursuant to which he was appointed as a director of the Company. There has been no transaction, or proposed transaction, since January 1, 2013, to which Dr. DiTrolino or any member of his respective immediate family had or is to have a direct or indirect material interest or any other related transaction with the Company within the meaning of Item 404(a) of Regulation S-K. However, Dr. DiTrolino is a party to a certain consulting contract with the Company entered into during September 12, 2012, which is further described under "Certain Relationships and Related Transactions." There are no family relationships between Dr. DiTrolino and any of the Company's other directors, executive officers or persons nominated or chosen by the Company to become directors or executive officers.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The following table sets forth the names of our directors, executive officer and certain significant employees and their ages, positions and biographical information as of the date of this annual report. Our executive officer is appointed by, and serves at the discretion of, our Board of Directors. There are no other family relationships among our directors or executive officer.

Name	Position	Age
Anthony G. Bruzzese, M.D.	Chairman	60
Mark McLaughlin	President, Chief Executive Officer and Director	57
John R. Strawn, Jr.	Director	54
Joseph DiTrolino, M.D.	Director	64

Anthony G. Bruzzese, M.D., Chairman

Dr. Bruzzese has served as Chairman of our Board of Directors since April 2004. He is a practicing radiologist in Warwick, Rhode Island, certified by both the American Board of Internal Medicine and the American Board of Radiology. Since 1997, Dr. Bruzzese has served as a principal at Toll Gate Radiology, Inc., providing patients with comprehensive diagnostic imaging services. Dr. Bruzzese also has served on the medical staffs at Roger Williams Medical Center since 2008 and Landmark Medical Center since 2011. He previously served on the medical staff at Kent County Memorial Hospital in Rhode Island from 1997 to 2005. Dr. Bruzzese has served as a Fellow, Councilor and Alternate Councilor to the American College of Radiology on behalf of the Rhode Island Radiology Society. Dr. Bruzzese received his Bachelor of Science and Doctor of Medicine from Brown University. Dr. Bruzzese brings to the Board of Directors over 20 years of experience in medical practice. The Board of Directors believes that Dr. Bruzzese's knowledge of internal medicine and life sciences will assist us in our future growth and expansion plans.

Mark McLaughlin, President, Chief Executive Officer and Director

Mr. McLaughlin has served as our President and member of the Board of Directors since March 2004 and Chief Executive Officer since April 2011. Mr. McLaughlin brings extensive knowledge about raising capital, marketing, business and corporate development, and of our operations and long-term strategy to the Board of Directors. In addition, Mr. McLaughlin played an integral role in successfully prosecuting several intellectual property violations in our favor. Since 1994, he has served as President of McLaughlin International, Inc., or MII, a management consulting firm controlled by Mr. McLaughlin. Previously, Mr. McLaughlin served as Senior Vice President at Oppenheimer & Co. from 1990 to 1992 and Lehman Brothers from 1981 to 1990. Mr. McLaughlin graduated from the College of the Holy Cross. The Board of Directors believes that Mr. McLaughlin's leadership and extensive knowledge about us is essential to our future growth

John R. Strawn, Jr., Director

Mr. Strawn has served as a member of our Board of Directors since July 2011. Mr. Strawn brings to the Board of Directors over 25 years of legal experience, including extensive knowledge of our intellectual property portfolio. His practice focuses on complex commercial litigation. Mr. Strawn has successfully represented the company for over 10 years, including in a dispute over the ownership and licensing of multiple patents. After prevailing in a jury trial that was upheld on appeal in 2009, the matter was settled on favorable terms for the company. In 2010, Mr. Strawn became a founding partner of Strawn Pickens LLP in Houston, Texas. Prior to founding Strawn Pickens, Mr. Strawn was the Co-Managing Partner of Cruse Scott Henderson & Allen LLP, a law firm based in Houston, Texas, since 1992. Mr. Strawn received his Juris Doctor from the University of Texas Law School and his bachelor's degree from Dartmouth College.

Dr. Joseph DiTrollo, M.D., Director

Dr. DiTrollo was appointed to our Board of Directors on September 4, 2014. Dr. DiTrollo has been the Chief Medical Officer of United States at ImmuDyne, Inc. since May 29, 2013 pursuant to a 2012 consulting agreement. Dr. DiTrollo serves as an advisor of OneMedPlace and as an advisor of Urovalve Inc. Dr. DiTrollo is recognized world-wide as an inventor, researcher and lecturer and is a Clinical Professor of Urology, UMDNJ. He is the holder of several patents and is Clinical Professor of Surgery, Division of Urology at New Jersey Medical School, and the recent Chairman of the Department of Urology for the St. Barnabas Medical Center Healthcare System. He is a graduate of the University of Richmond, University of Paris, Sorbonne and New Jersey Medical School. He is a Diplomate of the American Board of Urology and is well respected in the urology community for innovative techniques and product development.

Legal Proceedings

During the past ten years, none of our current directors or executive officers has been:

- the subject of any bankruptcy petition filed by or against any business of which such person was a general partner or executive officer either at the time of the bankruptcy or within two years prior to that time;
- convicted in a criminal proceeding or is subject to a pending criminal proceeding (excluding traffic violations and other minor offenses);
- subject to any order, judgment or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining, barring, suspending or otherwise limiting his involvement in any type of business, securities or banking activities;
- found by a court of competent jurisdiction (in a civil action), the SEC or the Commodity Futures Trading Commission to have violated a federal or state securities or commodities law, that has not been reversed, suspended, or vacated;
- subject of, or a party to, any order, judgment, decree or finding, not subsequently reversed, suspended or vacated, relating to an alleged violation of a federal or state securities or commodities law or regulation, law or regulation respecting financial institutions or insurance companies, law or regulation prohibiting mail or wire fraud or fraud in connection with any business entity; or
- subject of, or a party to, any sanction or order, not subsequently reversed, suspended or vacated, of any self-regulatory organization, any registered entity or any equivalent exchange, association, entity or organization that has disciplinary authority over its members or persons associated with a member.

None of our directors, officers or affiliates, or any beneficial owner of 5% or more of our common stock, or any associate of such persons, is an adverse party in any material proceeding to, or has a material interest adverse to, us or any of our subsidiaries.

Corporate Governance

We currently have no standing audit, compensation or nominating committees or committees performing similar functions, nor do we have written audit, compensation or nominating committee charters. Our Board of Directors believes it unnecessary to have such committees at this time because our Board of Directors can perform the functions of such committees adequately.

We do not have any defined policy or procedural requirements for shareholders to submit recommendations or nominations for directors. The Board of Directors believes that, given the stage of our development, a specific nominating policy would be premature until our business operations develop to a more advanced level. We currently do not have any specific or minimum criteria for the election of nominees to the Board of Directors and we do not have any specific process or procedure for evaluating such nominees. The Board of Directors will assess all candidates, whether submitted by management or shareholders, and make recommendations for election or appointment. A shareholder who wishes to communicate with our Board of Directors may do so by directing a written request addressed to our director at the address on the cover of this report.

Code of Ethics

We have not yet adopted a code of ethics within the definition of Item 406 of Regulation S-K. Currently, we only have a single executive officer and 3 full-time and 11 part-time employees. As our business continues to grow, and we become more experienced as a fully-reporting public company, our Board of Directors plans to implement a code of ethics.

Section 16(a) Beneficial Ownership Reporting Compliance

We are currently not subject to Section 16(a) of the Exchange Act as we do not have a class of equity securities registered pursuant to section 12 of the Exchange Act.

Item 11. Executive Compensation

As a “smaller reporting company,” we have elected to follow the scaled disclosure requirements for smaller reporting companies with respect to the disclosures required by Item 402 of Regulation S-K. Under such scaled disclosure, we are not required to provide a Compensation Discussion and Analysis, Compensation Committee Report and certain other tabular and narrative disclosures relating to executive compensation.

Executive Compensation

The following table sets forth information concerning the compensation of our principal executive officer for the years ended December 31, 2014 and 2013.

Summary Compensation Table

Name and Principal Position	Year	Salary (\$)	Option Awards \$(1)	Non-Equity	All Other Compensation (\$)	Total (\$)
				Incentive Plan Compensation (\$)		
Mark McLaughlin	2014	145,600	-	-(3)	21,000(4)	166,600
President, Chief Executive Officer and Director(2)	2013	145,600	-	-(3)	7,000(4)	152,600

(1) Amounts shown reflect aggregate grant date fair value and, where applicable, incremental fair value as of modification date, of awards and do not reflect whether the recipient actually has realized a financial benefit from such grant, such as by exercising the options or selling the stock. A discussion of the assumptions used in calculating the award values may be found in Note 2 to our financial statements contained herein.

(2) Mr. McLaughlin receives no compensation for serving as a member of our Board of Directors.

- (3) Under his employment agreement entered into on April 20, 2011, as amended, Mr. McLaughlin earns an annual incentive bonus award consisting of 5% of our pre-tax earnings payable each semi-annual fiscal year. We did not have any pre-tax earnings in 2014 or 2013, and no incentive bonus was earned or awarded.
- (4) In December of 2014 and 2013, the Board of Directors authorized a one-year extension of warrants to purchase 1.5 million shares of our common stock at \$0.12 per share that were set to expire as consideration, in part, for certain monetary advances made by Mr. McLaughlin to the Company. The warrants with such one-year extension of the expiration date in 2013 and 2014 had an incremental fair value of \$7,000 and \$21,000, respectively. The warrants were further extended in 2015 for an additional two-years as consideration for Mr. McLaughlin's personal guarantee of a loan made to the Company.

The following table sets forth information concerning the outstanding equity awards held by our principal executive officer at December 31, 2014.

Name	Option Awards			Option Exercise Price (\$)	Option Expiration Date
	Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (#) Unexercisable	Number of Securities Underlying Unexercised Options (#) Unearned		
Mark McLaughlin(1)	1,000,000	-	-	0.10	03/07/2018
	1,700,000	-	-	0.20	04/20/2021
	500,000	-	-	0.40	04/20/2021
	-	-	500,000(2)	0.40	04/20/2021
	-	-	500,000(3)	0.80	04/20/2021

- (1) All options held by Mr. McLaughlin are fully vested from grant date and exercisable on a cashless basis.
- (2) Options become earned and exercisable upon our achieving \$5 million in revenues in any fiscal year prior to the expiration date.
- (3) Options become earned and exercisable upon our achieving \$10 million in revenues in any fiscal year prior to the expiration date.

Employment Agreement

On October 12, 2012, we entered into a five-year employment agreement with Mr. McLaughlin, our President and Chief Executive Officer, under which he is to be compensated at \$145,600 per annum. In addition to his base salary, Mr. McLaughlin will earn an annual incentive bonus award consisting of 5% of our pre-tax earnings payable each semi-annual fiscal year. We also granted to Mr. McLaughlin under his employment agreement, as amended, 10-year, fully-vested options to purchase an aggregate of 3.3 million shares of our common stock, such options consisting of the right to purchase: (i) 1.7 million shares of our common stock at \$0.20 per share; (ii) 0.5 million shares of our common stock at \$0.40 per share; (iii) 0.5 million shares of our common stock at \$0.40 per share upon our achieving \$5 million in revenues in any fiscal year prior to the expiration date; and (iv) 0.5 million shares of our common stock at \$0.80 per share upon our achieving \$10 million in revenues in any fiscal year prior to the expiration date. If at any time prior to the expiration date of the options we merge into or are acquired by another company, any outstanding options granted under Mr. McLaughlin's employment agreement will become immediately exercisable on the business day immediately preceding the merger or acquisition at \$0.40 per share or the preceding average 30-day market price of our common stock prior to the announcement of such merger or acquisition, whichever price is lower.

Prior to our entering into this employment agreement, we compensated Mr. McLaughlin for his services as our President at \$10,000 per month. From time to time he voluntarily deferred this compensation without interest.

Our employment agreement with Mr. McLaughlin contains provisions prohibiting competition by him following his employment with us. Mr. McLaughlin's employment agreement specifies the conditions under which the agreement may be terminated and stipulates that he shall not be entitled to severance payments upon termination. Mr. McLaughlin is entitled to retain any options granted under his employment agreement and that remain outstanding at the time his employment agreement is terminated, however. We do not have any other existing arrangements providing for payments or benefits in connection with the resignation, severance, retirement or other termination of Mr. McLaughlin, or a change in control of the company or a change in his responsibilities following a change in control. We currently do not have any defined pension plan for Mr. McLaughlin. We currently do not have any nonqualified defined contribution or other plan that provides for the deferral of compensation for Mr. McLaughlin nor do we currently intend to establish any such plan.

Compensation of Directors

The following table sets forth information concerning the compensation of our directors for the year ended December 31, 2014.

Director Compensation for 2014

Name	Fees Earned or Paid in Cash (\$)	Option Awards \$(1)	Non-Equity Incentive Plan Compensation (\$)	All Other Compensation (\$)	Total (\$)
Anthony G. Bruzzese, M.D.	-	-(2)	-	1,000(2)	1,000
John R. Strawn, Jr.	-	(3)	-	-	-
Joseph DiTrolio, M.D.	-	6,500(4)	-(4)	6,500(5)	6,500

- (1) Amounts shown reflect aggregate grant date fair value and, where applicable, incremental fair value as of modification date, of awards and do not reflect whether the recipient actually has realized a financial benefit from such grant, such as by exercising the options or selling the stock. A discussion of the assumptions used in calculating the award values may be found in Note 2 to our financial statements contained herein.
- (2) As of December 31, 2014, Dr. Bruzzese held fully-vested options to purchase an aggregate of 1,310,000 shares of our common stock, such options consisting of the right to purchase: (i) 500,000 shares of our common stock at \$0.20 per share with an expiration date of December 31, 2014; (ii) 560,000 shares of our common stock at \$0.20 per share with an expiration date of April 20, 2021; and (iii) 250,000 shares of our common stock at \$0.40 per share with an expiration date of April 20, 2021, such options to become exercisable upon our achieving \$5 million in revenues in any fiscal year prior to the expiration date. Each such option held by Dr. Bruzzese is exercisable on a cashless basis. In December 2014, the Board of Directors authorized a one-year extension of the expiration for fully vested options held by Dr. Bruzzese to purchase 500,000 shares of our common stock at \$0.20 per share as consideration, in part, for certain monetary advances made by Dr. Bruzzese to the Company. This option extension had an incremental fair value of \$1,000
- (3) As of December 31, 2014, Mr. Strawn held fully-vested options to purchase an aggregate of 2,000,000 shares of our common stock, such options consisting of the right to purchase: (i) 1,000,000 shares of our common stock at \$0.20 per share with an expiration date of July 1, 2021; (ii) 500,000 shares of our common stock at \$0.40 per share with an expiration date of July 1, 2021; and (iii) 500,000 shares of our common stock at \$0.40 per share with an expiration date of July 1, 2021, such options to become exercisable upon our achieving \$5 million in revenues in any fiscal year prior to the expiration date. Each such option held by Mr. Strawn is exercisable on a cashless basis.

- (4) Under his director’s agreement effective as of September 4, 2014, Dr. DiTrollo was granted options consisting the right to purchase (i) 250,000 shares of our common stock at \$0.20 per share with an expiration date of September 4, 2024; and (ii) 125,000 shares of our common stock at an exercise price of \$0.40 per share with an expiration date of September 4, 2024, such options to become exercisable upon our achieving \$5 million in revenues in any fiscal year prior to the expiration date.
- (5) Dr. DiTrollo was also granted options to purchase shares of our common stock in connection with his consulting agreement with the company. See “Consulting Agreement with Director” under “Certain Relationships and Related Transactions.”

The Board of Directors may determine remuneration to be paid to the directors with interested members refraining from voting. Our independent directors each have entered into director’s agreements with us, pursuant to which they will receive annual cash compensation of an amount to be negotiated and agreed upon when we have the financial wherewithal to pay such compensation for their service. We also made grants of 10-year, fully-vested options to purchase 810,000 and 2,000,000 shares of our common stock as described in the footnotes to the above table to Dr. Bruzzese and Mr. Strawn, respectively, pursuant to their director’s agreements effective as of April 20, 2011. Dr. DiTrollo was granted 10-year, fully-vested options to purchase 325,000 share of our common stock as described in the footnote to the above table. If at any time prior to the expiration date of the options we merge into or are acquired by another company, any outstanding options granted under the directors’ agreements will become immediately exercisable on the business day immediately preceding the merger or acquisition at \$0.40 per share or the preceding average 30-day market price of our common stock prior to the announcement of such merger or acquisition, whichever price is lower. We do not compensate our non-independent director, Mr. McLaughlin, for serving as our director. All directors are eligible to receive reimbursement of expenses incurred with respect to attendance at board meetings, which is not included in the above table. We do not maintain a medical, dental or retirement benefits plan specifically for our directors, but all directors are eligible to participate in our employee group health and dental insurance plans.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following sets forth information as of March 30, 2015, regarding the number of shares of our common stock beneficially owned by (i) each person that we know beneficially owns more than 5% of our outstanding common stock, (ii) each of our directors and named executive officer and (iii) all of our directors and named executive officer as a group.

The amounts and percentages of our common stock beneficially owned are reported on the basis of SEC rules governing the determination of beneficial ownership of securities. Under the SEC rules, a person is deemed to be a “beneficial owner” of a security if that person has or shares “voting power,” which includes the power to vote or to direct the voting of such security, or “investment power,” which includes the power to dispose of or to direct the disposition of such security. A person is also deemed to be a beneficial owner of any securities of which that person has the right to acquire beneficial ownership within 60 days through the exercise of any stock option, warrant or other right. Under these rules, more than one person may be deemed a beneficial owner of the same securities and a person may be deemed to be a beneficial owner of securities as to which such person has no economic interest. Unless otherwise indicated, each of the shareholders named in the table below, or his or her family members, has sole voting and investment power with respect to such shares of our common stock. Except as otherwise indicated, the address of each of the shareholders listed below is: c/o Immudyne, Inc., 50 Spring Meadow Rd., Mount Kisco, NY 10549.

Name of beneficial owner	Number of shares	Percent of class
<i>5% Shareholders</i>		
Lane Deyoe 11997 N. Lake Dr. Boynton Beach, FL 33436	2,285,694(1)	7.4%
<i>Directors and named executive officer</i>		
Mark McLaughlin	9,492,354(2)	30.5%
Anthony G. Bruzzese, M.D.	2,249,999(3)	7.2%
John R. Strawn, Jr.	2,110,000(4)	6.7%
Joseph DiTrollo, M.D.	350,000(5)	0.0%
Directors and named executive officer as a group (4 persons)	14,102,353	44.4%

- (1) Includes 195,000 shares and presently-exercisable warrants to purchase 474,831 shares held of record by the Deyoe Family Limited Partnership over which Mr. Deyoe has sole voting and dispositive power.
- (2) Consists of 588,236 shares held of record by McLaughlin International, Inc., presently-exercisable warrants to purchase 1,500,000 shares, presently-exercisable warrants to purchase 294,118 shares held of record by McLaughlin International, Inc. and presently-exercisable options to purchase 3,300,000 shares. Mr. McLaughlin has sole voting and dispositive power over all shares and warrants held of record by McLaughlin International, Inc.
- (3) Consists of 115,000 shares held jointly with Dr. Bruzzese's spouse, presently-exercisable warrants to purchase 219,666 shares and presently-exercisable options to purchase 1,060,000 shares.
- (4) Consists of 400,000 shares and presently-exercisable warrants to purchase 200,000 shares held of record by Strawn Pickens LLP over which Mr. Strawn has shared voting and dispositive power, and presently-exercisable options to purchase 1,500,000 shares.
- (5) Consists of presently-exercisable options to purchase 350,000 shares.

We are not aware of any arrangements that could result in a change in control of the Company.

As of December 31, 2014, we have no formal equity compensation plan in effect.

Item 13. Certain Relationships and Related Transactions, and Director Independence

In addition to the executive officer and director compensation arrangements discussed in "Executive Compensation" beginning on page 33, the following describes transactions since January 1, 2013, to which we have been a participant, in which the amount involved in the transaction exceeds the lesser of \$120,000 or 1% of the average of our total assets at year end and in which any of our directors, executive officer or holders of more than 5% of our capital stock, or any immediate family member of, or person sharing the household with, any of these individuals, had or will have a direct or indirect material interest.

Royalty Agreement

We are subject to a royalty agreement, pursuant to which we are required to pay a monthly royalty of 8% on all sales of certain skin care products up to \$227,175. We entered into the royalty agreement to settle a suit between Mr. McLaughlin and us, over disputed patent and licensing arrangements. Mr. McLaughlin, our President, has a 60% interest in the royalties paid under the agreement, or \$136,305, and Akin, Gump, Strauss, Hauer & Feld L.L.P., Mr. McLaughlin's counsel in the matter, is entitled to the remaining 40% interest. Royalties earned and expensed were approximately \$40,000 in 2013 and \$45,000 in 2014. As of March 30, 2015, the remaining commitment under the royalty agreement is approximately \$20,000. Mr. McLaughlin and Akin, Gump customarily defer without interest payments due under the royalty agreement until, from time to time, we have the financial wherewithal to pay such royalties.

Indebtedness to our President and Directors

From time to time, Mr. McLaughlin, our President, has made short-term advances to us for our operating needs. These bear no interest are unsecured and have no fixed terms of repayment. Since 2013, the largest aggregate amount of principal outstanding was \$59,000. In 2013 principal paid was \$4,000 and no interest was paid. In 2014, principal paid was \$30,000 and no interest was paid.

From time to time, Dr. Bruzzese, our Chairman, has made advances to us for our operating needs. These advances bore interest at 5% per annum, were unsecured and had no fixed terms of repayment. Since 2013, the largest aggregate amount of principal outstanding was \$10,200. In 2013, no principal or interest was paid. In 2014, no principal was paid and \$595 interest was paid.

Common Stock Issuances

In November 2013, in connection with our private placement, we issued to Dr. Bruzzese, 100,000 shares of our common stock and 3-year warrants to purchase 50,000 shares of our common stock at \$0.25 per unit.

In November 2013, in connection with our private placement, we issued to Mr. Deyoe 130,000 shares of our common stock and 3-year warrants to purchase 65,000 shares of our common stock at \$0.25 per unit.

Employment Arrangements with an Immediate Family Member of our President

Brunilda McLaughlin, the wife of Mr. McLaughlin, our President, provides bookkeeping services for us. In April 2011, we entered into an employment agreement, as amended, with Mrs. McLaughlin doing business as McLaughlin International, Inc., a management consulting firm solely controlled by Mr. McLaughlin, under which we would compensate her for her services with (a) cash compensation of \$2,000 per month; (b) 10-year, fully-vested options with cashless exercise rights to purchase 200,000 shares of our common stock at \$0.20 per share; (c) 10-year, fully-vested options with cashless exercise rights to purchase 100,000 shares of our common stock at \$0.40 per share, such options to become exercisable upon our achieving \$5 million in revenues in any fiscal year prior to the expiration date; and (d) an annual incentive bonus award amounting to 0.5% of our pre-tax earnings.

Legal Services Provided by Director

Strawn Pickens LLP, a law firm co-founded by one of our directors, Mr. Strawn, performs legal services on our behalf on an hourly-fee basis in the ordinary course and has a contingency fee arrangement with us in a suit with former officers of the company and their affiliated entities. In June 2012, we issued Strawn Pickens LLP 402,333 shares of our common stock and 3-year warrants to purchase 200,000 shares of our common stock at \$0.40 per share in satisfaction of approximately \$68,000 in legal services. In 2013, we compensated Mr. Strawn \$176,000 (\$82,000 paid in 2013 and \$94,000 paid in 2014) in conjunction with the Company's judgment against and settlement with a former officer and affiliated parties.

Office Space Provided by our President

Our principal executive offices are in office space provided at no cost to us by our President, Mr. McLaughlin. This no cost arrangement is subject to change should we have the financial wherewithal to pay rent for such offices.

Consulting Agreement with Director

On September 12, 2012, we entered into a consultant agreement with one of our current directors, Joseph V. DiTroilo M.D. Under the agreement Dr. DiTroilo is to serve as a Chief Medical Officer of North America (alongside Dr. Sven Rohmann who is the Company's Global Chief Medical Officer) of the Company for a term of three years. In connection with the agreement Dr. DiTroilo was granted options consisting of the right to purchase (i) 100,000 shares of our common stock at \$0.20 per share with an expiration date of September 12, 2022; (ii) 250,000 shares of our common stock at \$0.40 per share with an expiration date of September 12, 2022, such options to become exercisable upon our achieving \$5 million in revenues in any fiscal year prior to the expiration date; and (iii) 250,000 shares of our common stock at \$0.80 per share with an expiration date of September 12, 2022, such options to become exercisable upon our achieving \$10 million in revenues in any fiscal year prior to the expiration date.

Director Independence

Our Board of Directors currently is comprised of four directors, Dr. Bruzzese, Dr. DiTrollo and Messrs. McLaughlin and Strawn. While we are not subject to any director independence requirements because of our quotation on the OTC Markets-OTQB, we have adopted the NASDAQ listed company standards for the purposes of determining director independence. Under these standards, the Board of Directors has determined that Dr. Bruzzese qualifies as an independent director. In determining the independence of our directors, the Board of Directors considered all transactions in which we and any director had any interest, including those discussed under “Certain Relationships and Related Transactions” beginning on page 37 of this Annual Report. The Board of Directors currently has no separately designated standing committees.

Item 14. Principal Accounting Fees and Services

Our Board of Directors has selected PKF O’Connor Davies, a division of O’Connor Davies, LLP (“PKF”) as the independent registered public accounting firm to audit our books and accounts for the fiscal years ending December 31, 2014 and 2013. PKF has served as our independent accountant since 2010. The aggregate fees billed, or expected to be billed, for the last two fiscal years ended December 31, 2014 and 2013, for professional services rendered by PKF were as follows:

	<u>2014</u>	<u>2013</u>
Audit fees	\$ 49,289	\$ 46,000
Audit-related fees	—	—
Tax fees	5,735	5,300
All other fees	—	—

In the above table, “audit fees” are fees billed for services provided related to the audit of our annual financial statements, quarterly reviews of our interim financial statements, and services normally provided by the independent accountant in connection with statutory and regulatory filings or engagements for those fiscal periods. “Tax fees” are fees billed, or to be billed, by the independent accountant for professional services rendered for tax compliance, tax advice and tax planning.

Our Board of Directors pre-approves all services provided by our independent accountants. Our Board of Directors reviewed and approved all of the above services and fees.

PART IV

Item 15. Exhibits, Financial Statement Schedules

The following documents are filed as part of or are included in this Annual Report:

1. Financial statements listed in the Index to Financial Statements, filed as part of this Annual Report beginning on page F-1; and
2. Exhibits listed in the Exhibit Index filed as part of this Annual Report.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Immudyne, Inc.

We have audited the accompanying balance sheet of Immudyne, Inc. as of December 31, 2014 and 2013, and the related statements of operations, stockholders' (deficit) equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits include consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Immudyne, Inc. as of December 31, 2014 and 2013, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has incurred a significant accumulated deficit through December 31, 2014, and has significant negative cash flows, for the year ended December 31, 2014. The Company may not have adequate readily available resources to fund operations through December 31, 2015. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

/s/ PKF O'Connor Davies

The accompanying notes are an integral part of these financial statements

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

1. Organization and Going Concern

Immudyne, Inc. (the "Company") is a Delaware corporation established to develop, manufacture and sell natural immune support products. The Company has developed a proprietary approach to produce the purest particulate and soluble beta glucans derived from yeast. The Company's core nutraceutical and cosmetic product lines consist of its pure yeast beta glucans in oral and topical applications to support the immune system. The Company concentrates its sales and marketing efforts on healthcare professionals, distributors for its all-natural raw material ingredient products and direct-to-consumer sales.

The Company has funded operations in the past through the sales of its products, issuance of common stock and through loans and advances from officers and directors. The Company's continued operations are dependent upon obtaining an increase in its sales volume and the continued financial support from officers and directors or the issuance of additional shares of common stock.

The accompanying financial statements have been prepared on the basis that the Company will continue as a going concern, which assumes the realization of assets and the satisfaction of liabilities in the normal course of business. At December 31, 2014, the Company has an accumulated deficit approximating \$8.5 million and has incurred negative cash flows. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The accompanying financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Based on the Company's cash balance at December 31, 2014, and projected cash needs in 2015, management estimates that it will need to raise additional capital to cover operating and capital requirements for the 2015 year. Management plans on raising the additional needed funds through increased sales volume, issuing additional shares of common stock or other equity securities, or obtaining debt financing. Although management has been successful to date in raising necessary funding, there can be no assurance that required future financing can be successfully completed on a timely basis, or on terms acceptable to the Company.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

2. Summary of Significant Accounting Policies

Basis of Presentation and Use of Estimates

The Company prepares its financial statements in conformity with accounting principles generally accepted in the United States of America which requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Some of the more significant estimates required to be made by management include the valuation of inventory and stockholders' equity based transactions. Actual results could differ from those estimates.

Inventory

At December 31, 2014 and 2013, inventory consisted primarily of nutraceutical and cosmetic products. Inventory is maintained in the Company's leased Kentucky warehouse.

Inventory is valued at the lower of cost or market with cost determined on a first-in, first-out ("FIFO") basis. Management compares the cost of inventory with the net realizable value and an allowance is made for writing down inventory to market value, if lower. At December 31, 2014 the Company recorded an inventory reserve in the amount of \$40,000 (\$20,000 at December 31, 2013).

Inventory consists of the following:

	<u>December 31</u>	
	<u>2014</u>	<u>2013</u>
Raw materials	\$ 4,350	\$ 17,126
Finished products	36,658	69,069
	<u>\$ 41,008</u>	<u>\$ 86,195</u>

Furnishings and Equipment

Furnishings and equipment are stated at cost. Depreciation is provided using the straight-line method over the estimated useful lives of the assets ranging from three to ten years.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

2. Summary of Significant Accounting Policies (continued)

Revenue Recognition

The Company's policy is to record revenue as earned when a firm commitment, indicating sales quantity and price exists, delivery has taken place and collectability is reasonably assured. The Company generally records sales once the product is shipped to the customer. If applicable, provisions for discounts, returns, allowances, customer rebates and other adjustments are netted with gross sales. The Company accounts for such provisions during the same period in which the related revenues are earned. Customer discounts, returns and rebates have not been significant.

Delivery is considered to have occurred when title and risk of loss have transferred to the customer. If title does not pass until the product reaches the customer's delivery site, then recognition of revenue is deferred until that time. There are no formal sales incentives offered to any of the Company's customers. Volume discounts may be offered from time to time to customers purchasing large quantities on a per transaction basis. There are no special post shipment obligations or acceptance provisions that exist with any sales arrangements

Revenue for the years ended December 31, 2014 and 2013 consists of nutraceutical and cosmetic products.

Segments

The guidance for disclosures about segments of an enterprise requires that a public business enterprise report financial and descriptive information about its operating segments. Generally, financial information is required to be reported on the basis used internally for evaluating segment performance and resource allocation. The Company manages its operations as a single segment for purposes of assessing performance and making operating decisions. Revenue is generated predominately in the United States, and all significant assets are held in the United States.

Income Taxes

The Company records current and deferred taxes in accordance with Accounting Standards Codification (ASC) 740, "Accounting for Income Taxes." This ASC requires recognition of deferred tax assets and liabilities for temporary differences between tax basis of assets and liabilities and the amounts at which they are carried in the financial statements, based upon the enacted rates in effect for the year in which the differences are expected to reverse. The Company establishes a valuation allowance when necessary to reduce deferred tax assets to the amount expected to be realized. The Company periodically assesses the value of its deferred tax asset, a majority of which has been generated by a history of net operating losses and determines the necessity for a valuation allowance.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

2. Summary of Significant Accounting Policies (continued)

Income Taxes (continued)

ASC 740 also provides a recognition threshold and measurement attribute for the financial statement recognition of a tax position taken or expected to be taken in a tax return. Using this guidance, a company may recognize the tax benefit from an uncertain tax position in its financial statements only if it is more likely-than-not (i.e., a likelihood of more than 50%) that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position.

The Company's tax returns for all years since December 31, 2011, remain open to most taxing authorities.

Stock-Based Compensation

The Company follows the provisions of ASC 718, "Share-Based Payment". Under this guidance compensation cost generally is recognized at fair value on the date of the grant and amortized over the respective vesting periods. The fair value of options at the date of grant is estimated using the Black-Scholes option pricing model. The expected option life is derived from assumed exercise rates based upon historical exercise patterns and represents the period of time that options granted are expected to be outstanding. The expected volatility is based upon historical volatility of the Company's shares using weekly price observations over an observation period that approximates the expected life of the options. The risk-free rate approximates the U.S. Treasury yield curve rate in effect at the time of grant for periods similar to the expected option life. The estimated forfeiture rate included in the option valuation was zero.

Many of the assumptions require significant judgment and any changes could have a material impact in the determination of stock-based compensation expense.

Earnings (Loss) Per Share

Basic earnings (loss) per common share is based on the weighted average number of shares outstanding during each period presented. Warrants and options to purchase common stock are included as common stock equivalents only when dilutive. Potential common stock equivalents are excluded from dilutive earnings per share when the effects would be antidilutive.

Common stock equivalents comprising shares underlying 14,107,720 and 13,772,720 options and warrants at December 31, 2014 and 2013, respectively, have not been included in the loss per share calculation as the effects are anti-dilutive.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

2. Summary of Significant Accounting Policies (continued)

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09 "Revenue from Contracts with Customers" (Topic 606) ("ASU 2014-09"). ASU 2014-09 is a comprehensive new revenue recognition model requiring a company to recognize revenue to depict the transfer of goods or services to a customer at an amount reflecting the consideration it expects to receive in exchange for those goods or services. In adopting ASU 2014-09, companies may use either a full retrospective or a modified retrospective approach. ASU 2014-09 is effective for the first interim period within annual reporting periods beginning after December 15, 2016, and early adoption is not permitted. The Company will adopt ASU 2014-09 during the first quarter of fiscal 2017. Management is evaluating the provisions of this statement and has not determined what impact the adoption of ASU 2014-09 will have on the Company's financial position or results of operations.

In August 2014, the FASB issued ASU 2014-15, "Presentation of Financial Statements-Going Concern". This ASU is intended to define management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. It is effective for annual periods beginning after December 15, 2016, with early adoption permitted. The Company does not expect it to have a material effect on the Company's financial condition, results of operations, and cash flows.

All other accounting standards that have been issued or proposed by the FASB that do not require adoption until a future date are not expected to have a material impact on the financial statements upon adoption.

Fair Value of Financial Instruments

FASB ASC Topic 820, Fair Value Measurements and Disclosures, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC Topic 820 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes the following three levels of inputs that may be used to measure fair value:

Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

2. Summary of Significant Accounting Policies (continued)

Fair Value of Financial Instruments (continued)

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The carrying value of the Company's financial instruments, including cash, trade accounts receivable and accounts payable and accrued expenses and notes payable approximate fair value for all periods. The fair value of the deposit payable at December 31, 2013, is also an approximation of its fair value.

Concentration of Credit Risk

The Company grants credit in the normal course of business to its customers. The Company periodically performs credit analysis and monitors the financial condition of its customers to reduce credit risk.

The Company monitors its positions with, and the credit quality of, the financial institutions with which it invests. The Company, at times, maintains balances in various operating accounts in excess of federally insured limits.

One customer accounted for 79% and 77% of sales for the years ended December 31, 2014 and 2013, respectively. At December 31, 2014 and 2013, this customer accounted for 100% and 70% of accounts receivable, respectively.

A second customer accounted for 12% and 9% of sales for the years ended December 31, 2014 and 2013, respectively. At December 31, 2014 and 2013, this customer accounted for 0% and 28% of accounts receivable, respectively.

3. Furnishings and Equipment

Furnishings and equipment consisted of the following:

	December 31	
	2014	2013
Furnishings and equipment, at cost	\$ 679,291	\$ 679,291
Accumulated depreciation	635,543	578,568
	<u>\$ 43,748</u>	<u>\$ 100,723</u>

Depreciation expense amounted to \$56,975 and \$56,974 for years ended December 31, 2014 and 2013, respectively.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

4. Joint Venture Agreement

In December 2013 the Company entered into a memorandum of understanding (MOU) with Aduvo Investment S.A. (AI), an investment company located in Poland, whereby AI paid the Company \$100,000 for the option, which expired in September 2014, to purchase up to 10% of the outstanding stock in the Company at \$0.25 per share. At December 31, 2013, the Company reported a \$100,000 deposit payable, which is included in the accompanying balance sheet.

In January 2014 the Company invested \$100,000 in AI in exchange for a minority interest of less than 1% in AI, and an option to acquire additional shares of AI up to an aggregate consideration of \$1,500,000. Further, AI granted the Company the right to participate in any subsequent public offerings of AI and the option to buy up to 10% of AI. The Company's investment in AI is accounted for at no value on the accompanying December 31, 2014 balance sheet.

5. Notes Payable

At December 31, 2014, notes payable are due to officers, directors and other related individuals and are payable on demand with interest at 5%. A summary of notes payable activity is as follows:

Balance at December 31, 2012	\$ -
Borrowing	94,200
Repayment	<u>(54,000)</u>
Balance at December 31, 2013	40,200
Borrowing	67,000
Repayment	<u>(80,000)</u>
Balance at December 31, 2014	<u>\$ 27,200</u>

Interest expense on notes payable amounted to \$4,683 and \$3,385 for the years ended December 31, 2014 and 2013, respectively.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

6. Income Taxes

The Company incurred a loss for the years ended December 31, 2014 and 2013 and accordingly, no provision for federal income tax has been made in the accompanying financial statements. At December 31, 2014, the Company had available net operating loss carryforwards of approximately \$2,870,000, expiring during various years through 2034.

A summary of the deferred tax asset using an approximate 34% tax rate is as follows:

	December 31	
	2014	2013
Net operating loss	\$ 975,000	\$ 900,000
Valuation allowance	(975,000)	(900,000)
Total	<u>\$ -</u>	<u>\$ -</u>

The net operating loss carryforwards could be subject to limitation in any given year in the event of a change in ownership as defined by IRC Section 382.

The deferred tax liability of \$13,200 and \$30,400 at December 31, 2014 and 2013, respectively, results from the difference in the carrying amount of furnishings and equipment between financial reporting and income tax reporting.

The deferred tax benefit included in the statement of operations represents the change in the deferred tax liability at each balance sheet date.

The difference between the statutory and the effective tax rate is primarily due to a change in valuation allowance on deferred taxes, as the Company has fully reserved the deferred tax asset resulting from available net operating loss carryforwards.

7. Stockholders' Equity

In January 2014 the Company issued 100,000 shares of restricted common stock valued at \$28,000 to a consultant and in September 2014 the Company issued 525,000 shares of restricted stock valued at \$52,500 to four additional consultants.

During 2014, the Company extended the expiration date of 500,000 options and 1,500,000 warrants one year from 2014 to 2015 and issued an additional 450,000 service-based and 300,000 performance-based options as discussed below. As a result of these transactions, and the amortization of options granted in 2012 through 2014, the Company recorded a charge to stock-based compensation expense of \$45,000 during the year ended December 31, 2014.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

7. Stockholders' Equity (continued)

During 2013, the Company raised \$125,000 in a common stock offering at \$0.25 per share. Each two shares of common stock issued included a three-year warrant for one share exercisable at \$0.40. The Company raised an additional \$50,000 through the exercise of 500,000 options. The Company issued 195,000 common shares for services valued at \$48,750.

During 2013, the Company extended the expiration date of 500,000 options and 1,500,000 warrants one year from 2013 to 2014 and issued an additional 575,000 options as discussed below. As a result of these transactions, and the amortization of options granted in 2012, the Company recorded a charge to stock-based compensation expense of \$102,000 and interest expense of \$3,000 during the year ended December 31, 2013.

Service-Based Stock Options

In September 2014 the Company issued 450,000 service-based options to a director and a consultant at exercise prices of \$.20 per share. The options are fully vested and expire in 10 years.

During 2013 the Company issued 525,000 service-based options to three consultants at exercise prices between \$0.20 and \$0.40 per share. All of these options vested fully during 2013 and expire in 10 years. Additionally, during October 2013 the Company issued 50,000 options with an exercise price of \$0.25 in conjunction with short term financing. These options are fully vested and expire in 3 years.

A summary of the outstanding service-based stock options are as follows:

	<u>Number of Options</u>
Balance at December 31, 2012	9,955,000
Granted	575,000
Exercised	(500,000)
Expired	<u>(145,000)</u>
Balance at December 31, 2013	9,885,000
Granted	<u>450,000</u>
Balance at December 31, 2014	<u><u>10,335,000</u></u>

Options exercisable at December 31, 2014 and 2013 amounted to 10,335,000 and 9,835,000, respectively.

All outstanding options have a cashless exercise provision, and certain options provide for accelerated vesting provisions and modifications, as defined, if the Company is sold or acquired.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

7. Stockholders' Equity (continued)

Service-Based Stock Options (continued)

The intrinsic value of options outstanding and exercisable amounted to \$0 and \$448,350 at December 31, 2014 and December 31, 2013, respectively. The intrinsic value of options exercised in 2013 amounted to \$100,000

The following is a summary of outstanding service-based options at December 31, 2014:

Exercise Price	Number of Options	Weighted Average Remaining Contractual Life
\$0.10	1,000,000	3 years
\$0.20 - \$0.25	8,185,000	7 years
\$0.40	1,150,000	7 years
Total	<u>10,335,000</u>	

The fair value of the 450,000 service-based options granted in 2014 amounted to \$17,500 which has been expensed during the year. All options granted during 2014 are fully vested. The fair value of the 575,000 service-based options granted in 2013 amounted to \$44,000 which has been expensed during the year. All the other service-based options issued through December 31, 2014 are fully vested.

Performance-Based Stock Options

In August 2014, the Company issued 300,000 options with an exercise price of \$0.20 to a consultant. The options are contingent upon the completion of a clinical study as defined. Management has valued these options at \$8,000 and is amortizing them over the implicit service period of one year. At December 31, 2014, \$2,000 had been amortized and the balance of \$6,000 remained to be amortized during the year ending December 31, 2015.

As of December 31, 2014 in addition to the 300,000 above, the Company had granted performance-based options to purchase 9,375,000 shares of common stock at exercise prices ranging from \$0.20 to \$5.00. The options expire at various dates between 2021 and 2024 and are exercisable upon the Company achieving annual sales revenue ranging from \$2,000,000 and \$100,000,000. The fair value of these performance-based options aggregated \$340,000 and will be expensed over the implicit service period commencing once management believes the performance criteria will be met. Accordingly, at December 31, 2014, the unearned compensation for performance based options is \$340,000.

Stock based compensation expense amounted to \$125,500 and \$153,750 for the years ended December 31, 2014 and 2013, respectively. Such amounts are included in compensation and related expenses (\$125,500 in 2014 and \$150,750 in 2013) and interest expense (\$3,000 in 2013) in the accompanying statement of operations.

Warrants

The following is a summary of outstanding and exercisable warrants:

	Number of Shares	Weighted Average Exercise Price	Year of Expiration
Balance at December 31, 2012	3,637,720	0.28	2013 - 2015
Granted	<u>250,000</u>	0.40	2016
Balance at December 31, 2013	3,887,720	0.29	2014 - 2016
Expired	<u>(115,000)</u>	0.40	2014
Balance at December 31, 2014	<u><u>3,772,720</u></u>	0.29	2015 - 2016

In connection with the issuance of common stock in 2013 the Company granted warrants to acquire 250,000 shares of common stock at \$0.40 per share. These warrants are immediately exercisable and expire in 2016

The fair value of options and warrants granted (or extended) during the years ended December 31, 2014 and 2013, was estimated on the date of grant (or extension) using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	2014	2013
Expected volatility	50%	50%
Risk free interest rate	2%	2%
Expected dividend yield	-	-
Expected option term (in years)	1 - 5	1 - 5
Weighted average grant date fair value	\$ 0.02	\$ 0.08

8. Royalties

The Company is subject to a royalty agreement based upon sales of certain skin care products. The agreement requires the Company to pay a royalty based upon 8% of such sales, up to \$227,175. Royalty expense approximated \$45,000 and \$40,000 for the years ended December 31, 2014 and 2013, respectively. The remaining commitment at December 31, 2014, is approximately \$20,000. The Company's President has a 60% interest in the royalties. Included in accounts payable and accrued expenses at December 31, 2014 is approximately \$133,000 related to this obligation.

9. Commitments and Contingencies

Leases

The Company leases a plant in Kentucky under an operating lease which expires May 31, 2016. Future minimum base rental payments required under the lease are as follows:

	Year ending <u>December 31</u>	
	2015	\$ 42,187
	2016	17,578
	Total	<u>\$ 59,765</u>

Monthly base rental payments approximate \$3,500. The lease agreement also provides for additional rents based on increases in building operating costs and real estate taxes. Rent expense for the years ended December 31, 2014 and 2013, was \$52,301 and \$55,430, respectively.

Employment and Consulting Agreements

The Company has entered into various agreements with officers, directors, employees and consultants that expire in one to five years. The agreements provide for annual compensation of up to \$145,000 and the issuance of stock options, at exercise prices ranging from \$0.20 to \$5.00, underlying 9,375,000 shares of common stock issuable upon the Company's revenue exceeding amounts ranging from \$2,000,000 to \$100,000,000, as defined. In addition, the agreements provide for bonus compensation to these individuals aggregating up to 15% (with no individual having more than 5%) of the Company's pretax income.

Legal Matters

In the normal course of business operations the Company may become involved in various legal matters. At December 31, 2014, the Company's management does not believe that there are any potential legal matters that could have an adverse effect on the Company's financial position.

In October 2013, the Company agreed to a judgment against the estate of a former officer and related individuals, and in March 2014, a settlement was reached with these parties in the amount of \$386,000. Legal settlement proceeds of \$210,000, net of related legal costs of \$176,000 (see note 10), are recorded in the accompanying statement of operations for the year ended December 31, 2013. During the year ended December 31, 2013, the Company received net proceeds of \$78,000 and the balance, \$132,000 net of related legal costs, is recorded as legal settlement proceeds receivable in the accompanying balance sheet as of December 31, 2013. The Company received the balance due at December 31, 2013, \$132,000 net of related legal costs, in March 2014.

Immudyne, Inc.

Notes to Financial Statements
December 31, 2014

9. Commitments and Contingencies *(continued)*

Legal Matters (continued)

In November 2009, the Company entered into a settlement agreement to resolve all aspects of litigation relating to a patent suit. As part of that settlement agreement, the Company received \$440,000 as reimbursement for litigation costs. The Company also was awarded \$200,000 in eight installments of \$25,000 every six months beginning on January 15, 2011, in return for an exclusive patent license. The term of the license agreement is consistent with the term of the \$25,000 semiannual payments. The \$25,000 installments have been recorded as revenue upon receipt of the funds. The Company received the final installment during 2014.

10. Related Party Transactions

One of the directors provides legal services to the Company. During the year ended December 31, 2013, the Company compensated this director \$176,000 (\$82,000 paid in 2013 and \$94,000 paid in 2014) in conjunction with the Company's judgment against and settlement with a former officer (note 9).

11. Subsequent Events

In January 2015 the Company obtained a \$100,000 loan with On Deck Capital, Inc. which requires 252 daily payments of principal and interest of \$492.

The Company has evaluated subsequent events through the date these financial statements were issued and has determined that, other than what is disclosed herein, there are no subsequent events or transactions requiring recognition or disclosure in the financial statements.

DIRECTOR AGREEMENT

This DIRECTOR AGREEMENT ("Agreement") is dated as of September 4, 2014, between IMMUDYNE, INC., a Delaware corporation (the "Company"), and Joseph V. DiTrollo, M.D. ("Director"). The Company and the Director are hereinafter sometimes referred to collectively as the "Parties" and individually as a "Party."

WITNESSETH:

WHEREAS, the Company desires to engage, and the Director agrees to provide services to the Company, and

WHEREAS, the parties hereto desire to set forth the terms of Director's engagement with the Company;

NOW, THEREFORE, for and in consideration of the mutual promises, covenants and obligations contained, the Company and Director hereby agree as follows:

1. Engagement and Location. The Company hereby appoints Director, and Director hereby accepts engagement by the Company, on the terms and conditions hereinafter set forth. Given the Director's personal circumstances, and circumstances at the Company, Director shall not be required to relocate.
2. Director's Duties. Director will serve as a Director of the Company. Director's duties shall include those which are designated or assigned to him from time to time by the Board of Directors of the Company or the By-laws of the Company, provided those duties are of the type customarily discharged by a person holding the same or similar offices in a company of similar size and operations as the Company.
3. Term of Engagement. Subject to the provisions for termination hereof; the original term of this Agreement shall commence as of the date hereof and shall continue for a term of two (2) years. Subsections 6(f) through 6(j) and Sections 7 through 20 of this Agreement shall survive termination hereof for any reason whatsoever.
4. Compensation. For all services rendered by Director hereunder on behalf of the Company, and the covenants and agreements of Director set forth herein (including without limitation the covenant not to compete set forth in Section 8 hereof), the Company agrees to pay to Director, and Director agrees to accept, the following compensation:
 - a) an annual retainer to be negotiated and agreed upon when the Company has the financial wherewithal to pay such a retainer;
 - b) a ten year, fully vested option for 250,000 shares of Common Stock of the Company (the "Option"), such shares purchasable or exercisable on a cashless basis at an exercise price of \$0.20 (twenty cents) per share; and
 - d) Should the fiscal year revenues of the Company reach \$5,000,000, a ten year fully vested option for an additional 125,000 shares of Common Stock of the Company, such shares purchasable at an exercise price of \$0.40 (forty cents) per share; and

- (e) If the Company is prevented from issuing any of options or the stock due to pending litigation, or for any other reason, then the expiration date(s) will commence (or recommence, if applicable) when the Company's options or the stock relating thereto are no longer subject to current litigation, or any other contingency prohibiting the Company from issuing said options or stock. Additionally, if the Company should merge into or be acquired by another company, any options or stock not granted up to the date of merger or acquisition will be granted to and will be immediately exercisable by Director on the business day immediately preceding the merger or acquisition at \$0.40 (forty cents) per share, or the preceding average 30 day market price of the Company's stock prior to the announcement of such merger or acquisition, whichever price is lower. If the effective day for establishing the exercise price for the options is a non-working day, the working day preceding such date shall be the effective date. All shares resulting from the exercise of options shall have the same rights as all other shares of the Company's capital stock. Further, if the Company should split its stock prior to the granting or exercise of said options, then the options shall be split in a similar manner and the exercise price shall be adjusted to prevent any dilution or increase in Director's interest in the Company's stock once the options are granted or exercised. Lastly, Director or his Estate will have the right to assign all his options, and the rights to his future options. Director's options and the rights to his future options do not terminate with his death. The options may be exercised by his heirs and his assigns and their heirs; and
 - (f) Prompt reimbursement of all reasonable expenses incurred by Director in the performance of Director's duties during the term of this Agreement, subject to the presentation of appropriate vouchers and receipts in accordance with the Company's policies.
5. Additional Benefits. Director shall be entitled to participate in or receive benefits under all benefit plans or programs generally available to directors of the Company to the extent that Director's position, tenure, salary, age, health and other qualifications make Director eligible to participate, subject to the rules and regulations applicable thereto.
6. Covenants of Director. For and in consideration of the engagement herein contemplated and the consideration paid or promised to be paid by the Company, Director does hereby covenant, agree and promise that during the term hereof, and thereafter to the extent specifically provided in this Agreement:
- (a) Director will not actively directly engage in any other business or venture that competes with the Company except at the direction or upon the written approval of the Company;
 - (b) Director will not directly engage in the ownership, management, operation or control of, or employment by, any business of the type and character engaged in by the Company or any of its subsidiaries. Director may make personal investments in public companies, such as those made through or recommended by a stock broker;

- (c) Director will truthfully and accurately make, maintain and preserve all records and reports that the Company may from time to time reasonably request or require;
- (d) Director will obey all rules, regulations and reasonable special instructions applicable to Director, and will be loyal and faithful to the Company at all times, constantly endeavoring to improve Director's ability and knowledge of the business in an effort to increase the value of Director's services to the mutual benefit of the Parties;
- (e) Director will make available to the Company any and all of the information of which Director has knowledge relating to the business of the Company or any of the Company's other subsidiaries and will make all suggestions and recommendations which Director feels will be of benefit to the Company;
- (f) Director will fully account for all records or other property belonging to the Company of which Director has custody, and will deliver the same promptly whenever and however he may be reasonably directed to do so;
- (g) Director recognizes that during the course of Director's engagement with the Company, Director has had and will have access to, and that there has been, and will be disclosed to him, information of a proprietary nature owned by the Company, including but not limited to records, customer and supplier lists and information, pricing information, data, formulae, design information and specifications, inventions, processes and methods, which is of a confidential or trade secret nature, and which has great value to the Company and is a substantial basis and foundation upon which the business of the Company is predicated. Director acknowledges that except for Director's engagement and the fulfillment of the duties assigned to Director, Director would not have had and would not have access to such information, and Director agrees that any and all confidential knowledge or information which may have been or may be obtained by or disclosed to Director in the course of Director's engagement with the Company, including but not limited to the information hereinabove set forth (collectively, the "Information"), will be held inviolate by Director, that Director will conceal the same from any and all other persons, including but not limited to competitors of the Company and its subsidiaries, and that Director will not impart the Information or any such knowledge acquired by Director as a director of the Company to anyone, either during Director's engagement by the Company or thereafter, except to employees, officers, directors or agents of the Company and its subsidiaries on a strict need-to-know basis in the performance of their duties for the Company or one of its subsidiaries. Director further agrees that during the term of this Agreement and for 3 years thereafter, Director will not use the Information in competing with the Company, or in any other manner to Director's benefit and to the detriment of the Company or its subsidiaries;

- (h) Director agrees that upon termination of Director's engagement hereunder Director will, in a timely fashion, surrender and turn over to the Company all books, records, forms, specifications, formulae, data, processes, papers and writings related to the business of the Company, and all other property belonging to the Company, together with all copies of the foregoing, it being understood and agreed that the same are the sole property, directly or indirectly, of the Company; and
- (i) Director understands and acknowledges that the securities of the Company are publicly traded and subject to the Securities Act of 1933 and the Securities Exchange Act of 1934. As a result, Director acknowledges and agrees that (i) he is required under applicable securities laws to refrain from trading in securities of the Company while in possession of material nonpublic information and to refrain from disclosing any material nonpublic information to anyone except as permitted by this Agreement in connection with the performance of Director's duties hereunder, and (ii) he will communicate to any person to whom he communicates any material nonpublic information that such information is material nonpublic information and that the trading and disclosure restrictions in clause (i) above also apply to such person.

7. Termination for Cause. The Company may terminate the engagement of Director if the Board of the Directors of the Company determines that Director has:

- (a) failed to cure within 14 days, after being informed in writing, a material breach of any provision hereof, or having habitually neglected the duties which Director was required to perform under any provision of this Agreement;
- (b) misappropriated funds or property of the Company or otherwise engaged in acts of dishonesty, fraud, misrepresentation or other acts of moral turpitude, even if not in connection with the performance of Director's duties hereunder, which could reasonably be expected to result in serious prejudice to the interests of the Company if Director were retained as a director;
- (c) secured any personal profit not completely disclosed to and approved by the Company in connection with any transaction entered into on behalf of or with the Company or any affiliate of the Company;
- (d) died, or become and remained incapacitated (either physically, mentally or otherwise) for a period of ninety (90) consecutive days such that Director is not able to substantially perform Director's duties hereunder; or
- (e) failed to carry out and perform duties assigned to Director in accordance with the terms hereof in a manner acceptable to the Board of Directors of the Company after a written demand for substantial performance is delivered to Director which identifies the manner in which Director has not substantially performed Director's duties, and provided further that Director shall be given a reasonable opportunity to cure such failure.

For purposes of this section, no act, or failure to act, on the Director's part shall be considered "willful" unless done, or omitted to be done, by him not in good faith and without reasonable belief that his action or omission was in the best interest of the Company. Notwithstanding the foregoing, the Director shall not be deemed to have been terminated For Cause under subsection (a) without (i) reasonable notice to the Director setting forth the reasons for the Company's intention to Terminate For Cause, (ii) an opportunity for the Director, together with his counsel, to be heard before the Board of Directors, and (iii) delivery to the Director of a notice of termination from the Board of Directors of the Company, finding that, in the good faith opinion of the Board of Directors, the Director was guilty of conduct set forth above in clause (a) of the preceding sentence and specifying the particulars thereof in detail. In the event of termination of Director's engagement for cause, Director shall be entitled to retain the Options for shares which have not been previously purchased, compensation through the date of termination and reimbursement of expenses properly incurred but not yet reimbursed.

8. Covenant Not to Compete. The Director recognizes that the Company has business good will and other legitimate business interests which must be protected in connection with and in addition to the Information, and therefore, in exchange for access to the Information, the specialized training and instruction which the Company will provide, the Company's agreement to engage the Director on the terms and conditions set forth herein, the Director agrees that during the term commencing with the date of engagement and ending one year after the date Director's engagement, Director will not, without the prior written consent of the Company, engage, directly or indirectly, in any business that competes with the Company or any of its subsidiaries in any territory in which the Company or any of its subsidiaries conducts business (determined as of the last date of Director's employment). It is mutually understood and agreed that if any of the provisions relating to the scope time or territory in this Section 8 are more extensive than is enforceable under applicable laws or are broader than necessary to protect the good will and legitimate business interests of the Company, then the Parties agree that they will reduce the degree and extent of such provisions by whatever minimal amount is necessary to bring such provisions within the am bit of enforceability under applicable law.
9. Injunctive Relief. The Parties acknowledge that the remedies at law for breach of Director's covenants contained in Sections 6 and 8 of the Agreement are inadequate, and they agree that the Company shall be entitled, at its election, to injunctive relief (without the necessity of posting bond against such breach or attempted breach), and to specific performance of said covenants in addition to any other remedies at law or equity that may be available to the Company.

10. Business Opportunities. For as long as the Director shall be engaged by the Company and thereafter with respect to any business opportunities learned about through Director's engagement by the Company, the Director agrees that with respect to any future business opportunity or other new and future business proposal which is offered to, or comes to the attention of, the Director and which is in any way related to or connected with, the business of the Company or its affiliates, the Company shall have the right to take advantage of such business opportunity or other business proposal for its own benefit. The Director agrees to promptly deliver notice to the Chairman of the Board of Directors or the Chief Executive Officer of the Company in writing of the existence of such opportunity or proposal, and the Director may take advantage of such opportunity only if the Company does not elect to exercise its right to take advantage of such opportunity and if the pursuit thereof would not otherwise violate any provision of this Agreement.
11. Right of Offset. To the extent permitted by applicable law, all amounts due and owing to Director hereunder shall be subject to offset by the Company to the extent of any damages incurred by Director's breach of this Agreement. Director acknowledges and agrees that but for the right of offset contained in this Agreement, the Company would not have hired Director nor entered into this Agreement.
12. Obligations of Director. The obligations of Director hereunder are personal and may not be transferred or delegated by Director.
13. Amendment and Waiver. This instrument contains the entire agreement of the Parties and is in addition to the Consultant Agreement dated September 12, 2012. This Agreement may not be changed orally but only by written documents signed by the Party against whom enforcement of any waiver, change, modification, extension or discharge is sought; however, the amount of compensation to be paid to Director for services to be performed for the Company hereunder may be changed from time to time by the Parties by written agreement without in any other way modifying, changing or affecting this Agreement or the performance by Director of any of the duties for the Company. Any such written agreement shall be, and shall be conclusively deemed to be, a ratification and confirmation of this Agreement, except as expressly set forth in such written amendment. The waiver by any Party of a breach of any provision of this Agreement shall not operate as or be construed to be a waiver of any subsequent breach thereof, nor of any breach of any other term or provision of this Agreement.
14. Notice. All notices and other communications hereunder shall be in writing and shall be deemed duly delivered (i) three business days after being received by registered or certified mail, return receipt requested, postage prepaid, or (ii) three business days after being sent for next business day delivery, fees prepaid, via a reputable nationwide overnight courier service, in the case of the Company, to its principal office address, and in the case of Director, to Director's residence address as shown on the records of the Company, or may be given by personal delivery thereof.

15. Severability. Whenever possible, each provision of this Agreement shall be interpreted in such manner as to be valid and enforceable under applicable law, but if any provision of this Agreement shall be invalid, unenforceable or prohibited by applicable law, then in lieu of declaring such provision invalid or unenforceable, to the extent permitted by law (a) the Parties agree that they will amend such provision to the minimal extent necessary to bring such provision within the ambit of enforceability, and (b) any court of competent jurisdiction may, at the request of either party, revise, reconstruct or reform such provision in a manner sufficient to cause it to be valid and enforceable.
16. Force Majeure. Neither of the Parties shall be liable to the other for any delay or failure to perform hereunder, which delay or failure is due to causes beyond the control of said Party, including, but not limited to: acts of God; acts of the public enemy; acts of the United States of America or any state, territory or political subdivision thereof or of the District of Columbia; fires; floods; epidemics, quarantine restrictions; strike or freight embargoes. Notwithstanding the foregoing provisions of this Section 18, in every case the delay or failure to perform must be beyond the control and without the fault or negligence of the Party claiming excusable delay.
17. Authority to Contract. The Company warrants and represents that it has full authority to enter into this Agreement and to consummate the transactions contemplated hereby and that this Agreement is not in conflict with any other agreement to which the Company is a party or by which it may be bound. The Company hereto further warrants and represents that the individuals executing this Agreement on behalf of the Company have the full power and authority to bind the Company to the terms hereof and have been authorized to do so in accordance with the Company's corporate organization.
18. Mediation. In the event of any dispute arising under or pursuant to this Agreement, the Parties agree to attempt to resolve the dispute in a commercially reasonable fashion before instituting any arbitration or litigation (with the exception of emergency injunctive relief as set forth in Paragraph 9). If the Parties are unable to resolve the dispute within thirty (30) days, then the Parties agree to mediate the dispute with a mutually agreed upon mediator. If the Parties cannot agree upon a mediator within ten (10) days after either party shall first request commencement of mediation, each party will select a mediator within five (5) days thereof, and those mediators shall select the mediator to be used. The mediation shall be scheduled within thirty (30) days following the selection of the mediator. If the mediation does not resolve the dispute, then Paragraph 20 shall apply. The Parties further agree that any applicable statute of limitations will be tolled for the period of time from the date mediation is requested until 14 days following the mediation.
19. Recovery of Litigation Costs. If any legal action or other proceeding is brought for the enforcement of this Agreement or any agreement or instrument delivered under or in connection with this Agreement, or because of an alleged dispute, breach, default or misrepresentation in connection with any of the provisions of this Agreement, the successful or prevailing Party or Parties shall be entitled to recover reasonable attorneys' fees and other costs incurred in that action or proceeding, in addition to any other relief to which it or they may be entitled.

20. Arbitration. Any and all disputes or controversies whether of law or fact and of any nature whatsoever arising from or respecting this Agreement shall be decided by arbitration by the American Arbitration Association in accordance with its Commercial Rules except as modified herein.
- (a) The arbitrator shall be elected as follows: in the event the Company and the Director agree on one arbitrator, the arbitration shall be conducted by such arbitrator. In the event the Company and the Director do not so agree, the Company and the Director shall each select one independent, qualified arbitrator and the two arbitrators so selected shall select the third arbitrator (the arbitrator(s) are herein referred to as the "Panel"). The Company reserves the right to object to any individual arbitrator who shall be employed by or affiliated with a competing organization.
 - (b) Arbitration shall take place in New York, or any other location mutually agreeable to the Parties. At the request of either Party, arbitration proceedings will be conducted in the utmost secrecy; in such case all documents, testimony and records shall be received, heard and maintained by the arbitrators in secrecy, available for inspection only by the Company or the Director and their respective attorneys and their respective experts who shall agree in advance and in writing to receive all such information in secrecy until such information shall become generally known. The Panel shall be able to award any and all relief, including relief of an equitable nature, provided that punitive damages shall not be awarded. The award rendered by the Panel may be enforceable in any court having jurisdiction thereof.
 - (c) Reasonable notice of the time and place of arbitration shall be given to all Parties and any interested persons as shall be required by law.
21. Governing Law. This Agreement and the rights and obligations of the Parties shall be governed by and construed and enforced in accordance with the substantive laws (but not the rules governing conflicts of laws) of the State of New York.
22. Multiple Counterparts. This Agreement may be executed in multiple counterparts each of which shall be deemed to be an original but all of which together shall constitute but one instrument.
23. Prior Agreements. The Company represents and warrants to Director, and Director represents and warrants to the Company, that Director and the Company have fulfilled all of the terms and conditions of all prior agreements to which Director may be or has been a party. The Parties further represent and warrant, except for the Director's options as described below, that the Director and the Company are forever released and held harmless from any and all obligations arising from any previous business agreements. Everything contained in any prior agreement is null and void.

EXECUTED as of the day and year first above set forth.

IMMUDYNE, INC.

DIRECTOR

By: /s/ Mark McLaughlin

**CERTIFICATION PURSUANT TO SECTION 302(a)
OF THE SARBANES-OXLEY ACT OF 2002**

I, Mark McLaughlin, certify that:

1. I have reviewed this Annual Report on Form 10-K for the period ended December 31, 2014, of Immudyne Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO SECTION 906
OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report on Form 10-K of Immudyne Inc. (the "Company") for the period ended December 31, 2014, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Mark McLaughlin, Chief Executive Officer of the Company, hereby certify, pursuant to 18 U.S.C. §1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. §78m or §78o(d)); and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Date: March 30, 2015

By: /s/ Mark McLaughlin
Mark McLaughlin
Principal Executive Officer and Principal
Financial Officer

This certification accompanies each Report pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and shall not, except to the extent required by the Sarbanes-Oxley Act of 2002, be deemed filed by the Company for purposes of Section 18 of the Securities Exchange Act of 1934, as amended.

A signed original of this written statement required by Section 906 has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.
